Subject: Sales Orders

Ryan, thanks for your time on the phone today. Pursuant to our conversation:

- Please use a HPP Customer Number and HPP Sales Order Number on the shipment BOL's. These numbers are used much like a profile or lab number. The numbers reference the client, material, processing instructions, billing information, etc. The CES Customer number is 134810. This number will go with any recyclable you send. The Sales Order Number for the Class 1 Mixed Recyclables is 67680 and the Sales Order Number for the Class 2 Mixed Recyclables is 67681. These 2 numbers are specific to the material.
- Next, I wanted to verify the TPH in the Class 2 Recyclables as Road Pavement Asphalt. Asphalt is not defined as a petroleum substance for Class 2 Classification. Please verify that the material is road asphalt and exempted from Class 2 Classification.

Thanks

Tim Day, CHMM

TRI-ACT 1800 INHIBITOR

Emergency Telephone Number

Medical (800) 462-5378 (24 hours) (800) I-M-ALERT

SECTION 1 PRODUCT IDENTIFICATION

TRADE NAME: TRI-ACT 1800 INHIBITOR

DESCRIPTION: An aqueous solution of amines

NFPA 704M/RMIS RATING: 2/3 BRALTE 2/2 FLAMMABILITY 0/0 REACTIVITY 0 OTHER

0=Insignificant 1=Slight 2=Moderate 3=High 4=Extreme

SECTION 2 COMPOSITION/INGREDIENT INFORMATION

Our hazard evaluation has identified the following chemical ingredient(s) as hazardous under OSHA's Razard Communication Rule, 29 CFR 1910.1200. Consult Section 15 for the nature of the hazard(s).

ingredient (3)	CAS ∦	* APPROX.*
Cyclohexylamine	108-91-8	10-20
Ethenolamine	141-43-5	10-20
Mathoxypropylamine	5332-73-0	10-20

SECTION 3 BAZARD IDENTIFICATION

EMERGENCY OVERVIEW:

DANGER! Corrosive. Causes eye and skin burns. Harmful if swallowed, inhaled or absorbed through skin. Combustible. Do not get in eyes, on skin or on clothing. Keep away from heat, sparks and flame. Avoid breathing vapor or mist. Keep container closed when not in use. Use with adequate ventilation. Wash thoroughly after handling.

Empty containers may contain residual product. Do not reuse container unless properly reconditioned.

PRIMARY ROUTE(S) OF EXPOSURE: Eye, Shin, Inhelation

RYE CONTACT:

Corrosive to the eyes with possible permanent damage depending on the length of exposure and on the first

aid action given.

SKIN CONTACT:

Corrosive to the skin, possibly resulting in third degree burns depending on the length of exposure and on the first aid action given. Can gause allergic contact dermatitis in susceptible individuals.

INCESTION: INHALATION: Can be harmful or fatal.

Can be corrosive to the nucous membranes and the lungs. Can cause an allergic reaction in susceptible individuals.

SYMPTOMS OF EXPOSURE: A review of available data does not identify any

symptoms from exposure not previously mentioned.

AGGRAVATION OF EXISTING CONDITIONS: A review of available data does not identify any worsening of existing conditions.

SECTION 4 FIRST AID INFORMATION

EYES:

Immediately flush for at least 15 minutes while holding

SKIN:

evalids open. Call a physician at once. Immediately flush with water for at least 15 minutes.

For a large splash, flood body under a shower. Call a

INGESTION:

physician at once.
Do not induce vomiting. Give water. Call a physician

at once.

INHALATION:

Remove to fresh air. Treat symptoms. Call a physician

at once.

NOTE TO PHYSICIAN: Based on the individual reactions of the patient, the physician's judgment should be used to control symptoms and clinical condition.

CAUTION: If unconscious, having trouble breathing or in convulsions, do not induce vomiting or give water.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be needed.

SECTION 5 FIRE FIGHTING

FLASE POINT: 135 Degrees F (PMCC) ASTM D-93

EXTINGUISHING MEDIA: Based on the NFPA guide, use dry chemical, foam, carbon dioxide or other extinguishing agent suitable for Class B fires. Use water to cool containers exposed to fire. For large fires, use water spray or fog, thoroughly dranching the burning material.

UNUSUAL FIRE AND EXPLOSION HAZARD: May evolve NOx under fire conditions.

SECTION 6 ACCIDENTAL RELEASE MEASURES

IN CASE OF TRANSPORTATION ACCIDENTS, CALL THE FOLLOWING 24-HOUR TELEPHONE NUMBER (800) 1-M-ALERT or (800) 462-5378.

SPILL CONTROL AND RECOVERY:

SECTION 6 ACCIDENTAL RELEASE MEASURES

(CONTINUED)

Small liquid spills: Contain with absorbent material, such as clay, soil or any commercially available absorbent. Shovel reclaimed liquid and absorbent into recovery or salvage drums for disposal. Refer to CERCIA in Section 15.

Large liquid spills: Dike to prevent further movement and reclaim into recovery or salvage drums or tank truck for disposal. Refer to CERCLA in Section 15.

For large indoor spills, evacuate employees and ventilate area. Those responsible for control and recovery should wear the protective equipment specified in Section 8.

SECTION 7 HANDLING AND STORAGE

Handling: Avoid contact with skin, eyes, and clothing.

Storage: Reep container closed when not in use.

SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

RESPIRATORY PROTECTION: Use either a chemical cartridge respirator with a dust/mist prefilter or supplied air.

For large spills, entry into large tanks, vessels or enclosed small spaces with inadequate ventilation, a positive pressure, self-contained breathing apparatus is recommended.

VENTILATION: General ventilation is recommended. Additionally, local exhaust ventilation is recommended where vapors or mists may be released.

PROTECTIVE EQUIPMENT: Wear impermeable gloves, boots, apron and a face shield with chemical splash goggles. Examples of impermeable gloves available on the market are neoptene, nitrile, PVC, natural rubber, viton and butyl (compatibility studies have not been performed). A full alicker suit is recommanded if gross exposure is possible.

The availability of an eye wash fountain and safety shower is recommended.

If clothing is contaminated, remove clothing and thoroughly wash the affected area. Launder contaminated clothing before rouse.

HUMAN EXPOSURE CHARACTERIZATION: Based on Nalco's recommended product application and our recommended personal protective equipment,

NOTE: These physical properties are typical values for this product.

SECTION 10 STABILITY AND REACTIVITY

INCOMPATIBILITY: N-nitrosaminas, many are cancer causing agents to laboratory animals, may be formed when certain amines are mixed with nitrous acid, organic or inorganic nitrites or atmospheres with high mitrous oxide concentrations.

Avoid contact with strong acids (eg. sulfuric, phosphoric, nitric, hydrochloric, chromic, sulfonic) which can generate heat, splattering or boiling and the release of toxic fumes.

THERMAL DECOMPOSITION PRODUCTS: In the event of combustion CO, CO2, NOx may be formed. Do not breathe smoke or fumes. Wear suitable protective equipment.

SECTION 11 TOXICOLOGICAL INFORMATION

TOXICITY STUDIES: Toxicity studies have been conducted on this product along with toxicity studies on the hazardous ingredient(s) in Section 2. The results are shown below.

ACUTE ORAL TOXICITY (ALBINO RATS): LD50 = 1267 mg/kg95% Confidence Limit = 1,047 to 1,532 mg/kg

COMMENTS: Excessive calivation, squinting of the eyes, loss of muscular coordination, prostration and irregular breathing were observed.

ACUTE DERMAL TOXICITY (ALBINO RABBITS):

PAGE 4 OF 11

SECTION 11 TOXICOLOGICAL INFORMATION

(CONTINUED)

LD50 - Greater than 2,000 mg/kg

COMMENTS: Redness, swelling, and blanching of the skin were noted. Scab formation was due to the corrosive action of the product. However, no systemic signs of toxicity were observed.

SKIN SENSITIEATION: Cyclohexylamine can dause sensitization in susceptible individuals.

PRIMARY EYE IRRITATION TEST (ALBINO RABBITS):

BYE IRRITATION INDEX DRAIZE RATING: Corrosive

COMMENTE: Severe redness, swelling, and blistering of the conjunctive were observed. Openification of the corner was also noted. Due to the extreme corrosive action of the test material, no Draize index rating could be assigned.

OTHER TOXICITY RESULTS: Cyclohexylamine. A battery of tests including the Ames test, sister chromatid exchange, cell transformation, mouse lymphoma and rat hepatocyte/DNA repair provided inconclusive evidence of mutagenic activity.

HUMAN HAZARD CHARACTERIZATION: Based on our hazard characterization, the potential human hazard is: HIGH.

SECTION 12 ECOLOGICAL INFORMATION

AQUATIC DATA: Results based on product.

96-hour static scute LC50 to Pathead Minnow = 194 mg/L

96 hour no observed effect concentration is 150 mg/L based on no mortality or abnormal effects.

TOXICITY RATING: Slightly toxic

96 hour static soute LC50 to Rainbow Trout = 200 mg/L

96 hour no observed effect concentration is 150 mg/L based on no mortality or abnormal effects.

TOXICITY RATING: Slightly toxic

48 hour static acute LC50 to Daphnia Magna = 326 mg/L

48 hour static acute EC50 to Daphnia Magna = Greater than 250 mg/L and Less than 400 mg/L

48 hour no observed effect concentration is 250 mg/L based on no mortality or abnormal effects.

TOXICITY RATING: Slightly toxic

If released into the environment, see CERCLA in Section 15.

ENVIRONMENTAL HAZARD CHARACTERIZATION: Based on our Hazard Characterization, the potential environmental hazard is: LOW. Based on Nalco's recommended product application and the product's characteristics, the potential environmental exposure is: HIGH.

SECTION 13 DISPOSAL CONSIDERATIONS

DISPOSAL: If this product becomes a wasta, it meets the criteria of a hazardous waste as defined under the Resources Conservation and Redovery Act (RCRA) 40 CFR 261. Hazardous Waste D001 & D002.

As a hazardous liquid waste, it must be solidified with stabilizing agents (such as sand, fly ash, or cement) so that no free liquid remains before disposal to a licensed industrial waste landfill (Eszardous Waste Treatment, Storage and Disposal facility). A hazardous liquid waste can also be incinerated in accordance with local, state, and federal regulations.

SECTION 15 REGULATORY INFORMATION

(CONTINUED)

A release of 100,000 pounds of product will require a notification to your State Emergency Response Commission.

You may also be required to notify the NATIONAL RESPONSE CENTER - See CERCLA/SUPERFUND, above.

SECTIONS 311 and 312 - MATERIAL SAFETY DATA SHEET REQUIREMENTS (40 CFR 370); Our hazard evaluation has found this product to be hazardous. The product should be reported under the following EPA hazard categories:

- XX Immediate (acute) health hazard
- -- Delayed (chronic) health hazard
- XX Fire hazard
- -- Sudden release of pressure hazard
- -- Resative hazard

Under SARA 311 and 312, the EPA has established threshold quantities for the reporting of harardous chemicals. The current thresholds are: 500 pounds or the threshold planning quantity (TPQ), whichever is lower, for extremely hazardous substances and 10,000 pounds for all other hazardous chemicals.

SECTION 313 - LIST OF TOXIC CHEMICALS (40 CPR 372): This product does not contain ingredients on the List of Toxic Chemicals.

TOXIC SUBSTANCES CONTROL ACT (TSCA):
The chemical ingradients in this product are on the 8(b) Inventory List
(40 CFR 710).

This product has been certified as KOSHER/PAREVE for year-round use INCLUDING THE PASSOVER SEASON by the CHICAGO RABBINICAL COUNCIL.

RESOURCE CONSERVATION AND RECOVERY ACT (RCRA), 40 CFR 261 SUBPART C & D: Consult Section 13 for RCRA classification.

FEDERAL WATER POLLUTION CONTROL ACT, CLEAN WATER ACT, 40 CFR 401.15 (formerly Sec. 307), 40 CFR 116 (formerly Sec. 311): None of the ingredients are specifically listed.

CLEAN AIR ACT, Sec. 111 (40 CFR 60), Sec. 112 (40 CFR 61, 1990 Amendments),
Sec. 611 (40 CFR 82, CLASS I and II Ozone depleting substances):
This product contains the following ingredients covered by the Clean Air Act:

Ethanolamine - Section 111 Cyclohexylamine - Section 111

STATE REGULATIONS:

CALIFORNIA PROPOSITION 65:

This product does not contain any chemicals which require warning under California Proposition 65.

MICHIGAN CRITICAL MATERIALS:

This product does not contain ingredients listed on the Michigan Critical Materials Register.

STATE RIGHT TO KNOW LAWS:

The following ingredient(s) are disclosed for compliance with State Right To Know Laws:

Cyclohexylamine 108-91-8 Ethanolamine 141-43-5 Methoxypropylamine 5332-73-0 Water 7732-18-5

SECTION 16 OTHER INFORMATION

Nalco internal number P700388

SECTION 17 RISE CHARACTERIZATION

Due to our commitment to Product Stewardship, we have evaluated the human and environmental hazards and exposures of this product. Based on our recommended use of this product, we have characterized the product's general risk. This information should provide assistance for your own risk management practices. We have evaluated our product's risk as follows:

- * The human risk is: LOW.
- * The environmental risk is: LOW.

Any use inconsistent with Nalco's recommendations may affect our risk characterization. Our sales representative will assist you to determine if your product application is consistent with our recommendations. Together we can implement an appropriate risk management process.

This product material safety data sheet provides health and safety information. The product is to be used in applications consistent with our product literature. Individuals handling this product should be

See Sections XII and XIII for regulatory and further compositional data. NOTE: Limits shown for guidance only. Follow applicable regulations.

****Note: This product contains aromatic oils. Aromatic oils contain high concentrations of polycyclic aromatic compounds, some of which have been shown to cause skin cancer in humans under conditions of poor personal hygiene and prolonged, repeated contact. Certain of these compounds have also produced harmful effects in laboratory animals after absorption through the skin. Although these effects have been principally to the liver and blood-forming organs, the unborn young of these animals may also be affected. The animal experiments also showed that these effects can be prevented by thorough removal of the oil from the skin. Overexposure to benzene can result in blood disorders and damage to the bone marrow. In rare instances leukemia has also been reported. At very high levels of exposure, kidney and liver damage could occur.

************** V. EMERGENCY AND FIRST AID PROCEDURES
--- FOR PRIMARY ROUTES OF ENTRY ---******

EYE CONTACT: Flush thoroughly with water for at least 15 minutes. Get medical assistance.

SKIN CONTACT: Dry-wipe the skin. Cleanse the area with waterless hand cleaner, and follow by washing thoroughly with soap and water. Remove contaminated clothing. Launder clothing before reuse. Discard shoes if material has penetrated to inside surface. Do not wear ordinary clothing wet with this product. If widespread contact, immediately remove contaminated clothing under safety shower and wash exposed areas with soap and large quantities of water. If burned by contact with hot material, cool molten material adhering to skin as quickly as possible with water, and see a physician for removal of adhering material and treatment of burn.

INHALATION: Remove from further exposure. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance and call a physician. If breathing has stopped, use mouth to mouth resuscitation.

INGESTION: If swallowed, immediately give 1 to 2 glasses of water and call a physician, hospital emergency room or poison control center for assistance. Do not induce vomiting or give anything by mouth to an unconscious person.

935726-00 Page 3 of10

FLASH POINT F(C): > 230(110) FLAMMABLE LIMITS. LEL: NE UEL: NE

EXTINGUISHING MEDIA: CO2, foam, dry chemical.

SPECIAL FIRE FIGHTING PROCEDURES: Water or foam may cause frothing. Use water to keep fire exposed containers cool. Water spray may be used to flush spills away from exposure. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water

supply. SPECIAL FROTECTIVE EQUIPMENT: For fires in enclosed areas, fire fighters

must use self-contained breathing apparatus.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Storage tank headspace may contain flammable atmosphere. Avoid ignition sources.

NFPA HAZARD ID: Health: 3, Flammability: 1, Reactivity: 0

STABILITY (Thermal, Light, etc.): Stable
CONDITIONS TO AVOID: Overheating may result in thermal cracking and
produce flammable vapors.
INCOMPATIBILITY (Materials to Avoid): Strong oxidizers and water.
HAZARDOUS DECOMPOSITION PRODUCTS: Sulfur oxides. Hydrogen sulfide. Carbon monoxide.

HAZARDOUS POLYMERIZATION: Will not occur.

number (800) 424-8802.

PROCEDURES IF MATERIAL IS RELEASED OR SPILLED: Shovel up and dispose of at an appropriate waste disposal facility in accordance with current applicable laws and regulations, and product characteristics at time of disposal.

WASTE MANAGEMENT: Dispose of waste by supervised incineration in compliance with applicable laws and regulations.

IX. SPECIAL PROTECTION INFORMATION *************

EYE PROTECTION: Chemical type goggles must be worn.

SKIN PROTECTION: Thermally protective gloves must be worn when handling this material. If contact is likely, oil impervious clothing should be worn. When handling large quantities, impervious suits and boots must be worn. Good personal hygiene practices should always be followed.

RESPIRATORY PROTECTION: Approved respiratory protective equipment must be used in high vapor or mist concentrations. No special requirements under ordinary conditions of use and with adequate ventilation.

VENTILATION: Use in well ventilated area. OTHER: Avoid all personal contact.

935726-00 Page 4 of10

GE:
A flammable atmosphere can be produced in storage tank headspaces even when stored at a temperature below STORAGE: the flashpoint. Monitor and maintain headspace gas concentrations below flammable limits. Ensure that there are no ignition sources in the area immediately surrounding filling and venting operations. Avoid sparking conditions. Ground and bond all transfer equipment. MATERIALS MUST BE LABELED AS FOLLOWS: May cause cancer. May cause chronic effects. May cause reproductive system effects. Harmful if absorbed through the skin. Vapor Harmful. See Appendix for Precautionary Label: MPL-323

Precautionary Label: MPL-323

935726-00 Page 5 of10

XI. TOXICOLOGICAL DATA ***************** ********

ORAL TOXICITY (RATS): Practically non-toxic (LD50: greater than 2000 mg/kg). --- Based on testing of similar products and/or the

components.

DERMAL TOXICITY (RABBITS): Practically non-toxic (LD50: greater than 2000 mg/kg). ---Based on testing of similar products and/or the components.

INHALATION TOXICITY (RATS): Practically non-toxic (LC50: greater than 5 mg/l). --- Based on testing of similar products and/or the components.

EYE IRRITATION (RABBITS): Practically non-irritating. (Draize score:

or greater but 6 or less). ---Based on testing of similar products and/or the components.

SKIN IRRITATION (RABBITS): Practically non-irritating. (Primary Irritation Index: 0.5 or less). ---Based on testing of similar products and/or the components. products and/or the components.

--- GENETIC TOXICOLOGY (SUMMARY) ---Benzene was not mutagenic in most mutagenicity test systems, but has been reported to induce chromosomal changes in bone marrow and blood

cells of some exposed workers.

---SUBCHRONIC TOXICOLOGY (SUMMARY)--Repeated dermal application to rats for 13 weeks was carried out with aromatic oils similar to some of the components used in this product. Resulting effects included increased mortality, increased liver weight, decreased thymus gland weight and lymphoid tissue and blood disorders. Kidney and bone marrow toxicity and skin

irritation were also observed in some cases.
---REPRODUCTIVE TOXICOLOGY (SUMMARY)--Repeated dermal application to pregnant rats was carried out using aromatic oils similar to some of the components used in this product. Results included maternal toxicity decreased fetal body weights and decreased fetal survival. Malformations and decreased sperm count were also observed in some cases. Some animal studies suggest that severe overexposure to benzene may result in growth retardation to the developing retus. Some effects on reproductive organs in mice have also been reported. In most inhalation studies with laboratory animals, benzene did not result in any malformations or reproductive effects.

--- CHRONIC TOXICOLOGY (SUMMARY) ---Expected to be carcinogenic in lifetime mouse skin painting bloassays. Animal studies with benzene by inhalation or by oral administration have resulted in evidence of carcinogenic effects in a number of tissues and organs, adverse effects on the immune system, chromosomal changes, anemia and possibly leukemia. Both NTP and IARC list benzene as a human carcinogen. Long-term exposure to benzene at <100 ppm has been reported to result in blood abnormalities in humans, including anemia and, in rare cases, leukemia. These effects may develop over months or years without warning symptoms.

---OTHER TOXICOLOGY DATA---****Trace amounts of hydrogen sulfide, a toxic gas, may be present when this material is handled in liquid form. Keep face clear of tank and/or tank car openings. Skin cleansing studies with aromatic oils show that toxic effects are not likely to occur in humans if good personal hygiene practices are used.

Precautionary Label Text:

CONTAINS STEAM CRACKED PETROLEUM RESIDUUM AND BENZENE.

CAUTION

MAY CAUSE THERMAL BURNS.
CAN CAUSE CANCER, BIRTH DEFECTS, LIVER AND BLOOD DAMAGE.
PROLONGED, REPEATED SKIN CONTACT WITH AROMATIC OILS CAN CAUSE SKIN CANCER
LIVER DAMAGE AND EFFECTS ON THE UNBORN.
REPEATED INHALATION OF BENZENE CAN CAUSE BLOOD ABNORMALITIES AND LEUKEMIA
CAN PRODUCE FLAMMABLE ATMOSPHERE AND TOXIC HYDROGEN SULFIDE GAS.

WEAR THERMAL PROTECTIVE OIL IMPERVIOUS GLOVES AND CLOTHING. AVOID ALL PERSONAL CONTACT.
AVOID BREATHING VAPOR OR MIST.
KEEP AWAY FROM HEAT AND FLAME.
USE WITH ADEQUATE VENTILATION.
KEEP CONTAINER CLOSED.
WASH THOROUGHLY AFTER HANDLING.

FIRST AID: IN CASE OF CONTACT WITH HOT MATERIAL, IMMERSE AFFECTED AREA IN LARGE AMOUNTS OF COLD WATER. CALL A PHYSICIAN IMMEDIATELY FOR REMOVAL OF ADHERING MATERIAL AND BURN TREATMENT.
IN CASE OF OTHER CONTACT, PROMPTLY DRY WIPE THE SKIN. CLEANSE AREA WITH WATERLESS HAND CLEANER AND FOLLOW BY WASHING THOROUGHLY WITH SOAP WITH SOAP AND WATER. CALL A PHYSICIAN IF SYMPTOMS OCCUR.

ORDINARY CLOTHING WET WITH THIS MATERIAL MUST BE REMOVED. LAUNDER CONTAMINATED CLOTHING BEFORE REUSE. DISCARD SHOES IF MATERIAL HAS PENETRATED TO INSIDE SURFACE.

FOR INDUSTRIAL USE ONLY.
NOT INTENDED OR SUITABLE FOR USE IN OR AROUND A HOUSEHOLD OR DWELLING.

EMPTY CONTAINERS MAY CONTAIN PRODUCT RESIDUE, INCLUDING FLAMMABLE OR EXPLOSIVE VAPORS. DO NOT CUT, PUNCTURE OR WELD ON OR NEAR CONTAINER. ALL LABEL WARNINGS AND PRECAUTIONS MUST BE OBSERVED UNTIL CONTAINER HAS BEEN THOROUGHLY CLEANED OR DESTROYED.

THIS WARNING IS GIVEN TO COMPLY WITH CALIFORNIA HEALTH AND SAFETY CODE 25249.6 AND DOES NOT CONSTITUTE AN ADMISSION OR A WAIVER OF RIGHTS.

DETECTABLE AMOUNTS OF CHEMICALS KNOWN BY THE STATE OF CALIFORNIA TO CAUSE CANCER MAY BE FOUND IN THIS PRODUCT. READ AND FOLLOW LABEL DIRECTIONS AN USE CARE WHEN HANDLING THIS PRODUCT.

REFER TO PRODUCT MATERIAL SAFETY DATA BULLETIN FOR FURTHER SAFETY AND HEALTH INFORMATION.

Material Safety Data Sheet

SKIN CONTACT: May cause mild irritation after prolonged or repeated contact.

EYE CONTACT: May cause redness and mild burning.. Corneal

damage may, occur after prolonged contact

Avoid contact with eyes.

INGESTION: May cause gastric distress, nausea, abdominal

discomfort, vomiting and diarrhea.

MEDICAL CONDITION AGGRAVATED BY EXPOSURE:

None known

SYMPTOMS/EFFECT OF OVEREXPOSURE: ..

INGESTION:....

Eye irritant. Prolonged inhalation exposure can produce weakness, fatigue, signs of intoxication.

FIRST AID

EYES: Flush eyes thoroughly with water for at least 15

minutes lifting eyelids occasionally. If irritation

persists contact a physician.

SKIN: Wash skin with soap and water.

Do not induce vomiting. Seek medical attention

immediately.

INHALATION: Remove to fresh air. If breathing is difficult

qualified persons may administer oxygen. Call a

physician.

Section VI: Reactivity Data

STABILITY: Stable

INCOMPATIBLE MATERIALS: Strong oxidizing agents & acids

HAZARDOUS DECOMPOSITION PRODUCTS: Oxides of carbon HAZARDOUS POLYMERIZATION: Will not occur.

CONDITIONS TO AVOID: None known

MATERIAL SAFETY DATA SHEET

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: Monochlorobenzene

PRODUCT ID: 0029

SYNONYMS: Chlorobenzene; MCB; aromatic chlorohydrocarbon; C₆ H₅ Cl

ISSUE DATE: 07/02/2003

EDITION NO.: 10

PPG Industries, Inc.
One PPG Place, Pittsburgh, PA 15272, USA
24-hour Emergency Telephone Number: 1-304-843-1300
For Product Information (8am-5pm Eastern time):
1-800-243-6774 (C/A)

PREPARER: Product Safety, Chemicals

2. COMPOSITION/INFORMATION ON INGREDIENTS

Material/CAS Number

Percent

Monochlorobenzene

99.9

108-90-7

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:

WARNING! Flammable. Vapor and liquid extremely irritating to eyes and skin. May be absorbed through the skin. May cause respiratory tract irritation. Harmful or fatal if inhaled. Harmful or fatal if swallowed. Avoid contact with aluminum. Do not ship in aluminum trailers. Very toxic to aquatic organisms. Keep away from heat, sparks, flames and other sources of ignition.

Precautions: Avoid contact with eyes and skin. Can cause irritation, pain, and in some cases, blistering of the skin. Do not breathe vapors. High vapor concentrations can cause dizziness, unconsciousness, central nervous system depression or death. Long-term overexposure may cause liver/kidney injury. Do not use in poorly ventilated or confined spaces without proper respiratory protection. Ventilation must be sufficient to limit employee exposure to this product below permissible exposure limits. Do not swallow. Wash thoroughly every day after work. Do not eat, drink or smoke in work area.

4. FIRST AID MEASURES

Page 1 of 7

PPG: 0029 Mono vorobenzene 07	7/02/2
-------------------------------	--------

INHALATION: Remove from area to fresh air. Contact a poison control center, emergency room or physician right away as further treatment will be necessary.

EYE/SKIN CONTACT: EYE: Remove contact lens and pour a gentle stream of warm water through the affected eye for at least 15 minutes. Contact a poison control center, emergency room or physician right away as further treatment will be necessary. SKIN: Run a gentle stream of water over the affected area for 15 minutes. A mild soap may be used if available. Contact a poison control center, emergency room or physician right away as further treatment will be necessary.

INGESTION: Gently wipe or rinse the inside of the mouth with water. Sips of water may be given if person is fully conscious. Never give anything by mouth to an unconscious or convulsing person. Do Not induce vomiting. Contact a poison control center, emergency room or physician right away as further treatment will be necessary.

NOTES TO PHYSICIAN:

Only administer adrenaline after careful consideration following overexposure. Increased sensitivity of the heart to adrenaline may be caused by overexposure to this product.

5. FIRE FIGHTING MEASURES

FLASH POINT: 82.4°F (28°C) (Tag Closed Cup)

FLAMMABLE LIMITS IN AIR - LOWER (%): 1.3

FLAMMABLE LIMITS IN AIR - UPPER (%): 7.1

EXTINGUISHING MEDIA: Carbon dioxide. Dry chemical.

SPECIAL FIREFIGHTING PROCEDURES: Emits toxic furnes under fire conditions. When this product is involved in fires, it can decompose to toxic, corrosive hydrogen chloride and possible traces of phosgene. Fire-fighters must wear NIOSH approved pressure demand, self-contained breathing apparatus and full protective clothing when fighting chemical fires. Vapor concentration in a confined or poorly ventilated area can be ignited upon contact with a high energy spark, flame, or high intensity source of heat. This can occur at concentrations ranging between the lower and upper limits (by volume) listed above.

6. ACCIDENTAL RELEASE MEASURES

ACTION TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Immediately evacuate the area. Provide maximum ventilation. Remove sources of ignition. Unprotected personnel should move upwind of spill. Only personnel equipped with proper respiratory and eye/skin protection should be permitted in the area. Dike area to contain spill. Take precautions as necessary to prevent contamination of ground and surface waters. Recover spilled material on adsorbents, such as sawdust or vermiculite, and sweep into closed containers for disposal. After all visible traces, including ignitable vapors, have been removed, thoroughly wet vacuum the area. Do not flush to sewer. If area of spill is porous, remove as much earth and gravel, etc. as necessary and

PPG:

place in closed containers for disposal.

7. HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN DURING HANDLING AND STORAGE:

Vapors are heavier than air and will collect in low areas. Keep away from heat, sparks, flames, direct sunlight, and other sources of heat. Keep container closed when not in use. Store only in closed, properly labeled containers. Store in a cool, dry, well-ventilated place. Do not use in poorly ventilated or confined spaces without proper respiratory protection. Adequate ventilation must be maintained in storage areas to reduce fire hazard in the event of a leak. This material or its vapors when in contact with flames, hot glowing surfaces or electric arcs can decompose to form hydrogen chloride gas and possible traces of phosgene. Avoid contamination of water supplies. Handling, storage and use procedures must be carefully monitored to avoid spills or leaks. Any spill or leak has the potential to cause underground water contamination which may, if sufficiently severe, render a drinking water source unfit for human consumption. Contamination that does occur cannot be easily corrected. Do not use cutting or welding torches on drums that contained this product unless properly purged and cleaned. Do not store or stack aluminum in contact with this product to prevent possible solvent decomposition (stacking corrosion). Liquid oxygen or other strong oxidants may form explosive mixtures with this product. Caution should be taken not to use in pressurized or totally enclosed system of aluminum construction (example - paint or adhesive spray system). Do not ship in aluminum trailers. Chlorinated solvents can damage aluminum trailers which could ultimately result in an environmental spill. Container and system must be electrically grounded before unloading.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Limits:

8-hour Time Weighted Average (TWA); 15-minute Short-Term Exposure Limit (STEL)

OSHA: The OSHA exposure limit(s) for Monochlorobenzene: 75 ppm TWA.

ACGIH: The ACGIH exposure limit(s) for Monochlorobenzene: 10 ppm TWA

RESPIRATORY PROTECTION: Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH-approved air purifying respirator with the appropriate chemical cartridges or a positive-pressure air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective, its limitations, and how it is to be properly fitted and used.

VENTILATION: Use local exhaust or general room/dilution ventilation sufficient to maintain employee exposure below permissible exposure limits.

EYE AND FACE PROTECTION: Chemical safety goggles.

PROTECTIVE GLOVES: Impervious gloves. Viton®. Polyvinyl alcohol (degrades in water).

OTHER PROTECTIVE EQUIPMENT: Boots, aprons, or chemical suits should be used when

necessary to prevent skin contact.

9. PHYSICAL AND CHEMICAL PROPERTIES

BOILING POINT: (268.9°F) 131.6°C

VAPOUR DENSITY (Air=1): 3.88

SPECIFIC GRAVITY (Water=1): _____1.1071 @ 20°C

pH: _____Neutral

FREEZING/MELTING POINT: (-49.4°F) -45.2°C

SOLUBILITY (wt.% in water): 0488 @ 30°C

BULK DENSITY: 9.18 lbs/gal at 25°C

VOLUME % VOLATILE: _____100

VAPOR PRESSURE: _____11.8 mm Hg @ 20°C

EVAPORATION RATE: NA
HEAT OF SOLUTION: Negligible
PHYSICAL STATE: Liquid

ODOR: Mild mothball-like odor

COLOR: Colorless

10. STABILITY AND REACTIVITY

STABILITY: Stable.

HAZARDOUS POLYMERIZATION: Will not occur.

INCOMPATIBILITY (CONDITIONS/MATERIALS TO AVOID):

Open flames, hot glowing surfaces or electric arcs. Avoid contact with aluminum. Strong acids, strong oxidizers, corrosive to aluminum. Contact with oxidizing materials, aluminum, potassium, sodium, magnesium, and aluminum spray equipment.

HAZARDOUS THERMAL DECOMPOSITION/COMBUSTION PRODUCTS:

Hydrogen chloride gas. Possible traces of phosgene. Carbon monoxide. Carbon dioxide.

11. TOXICOLOGICAL INFORMATION

ACUTE INHALATION LC50: 22,000 ppm (rat) Slight to very low toxicity.

ACUTE ORAL LD50: 1580 mg/kg (rat) Moderate toxicity.

CARCINOGENICITY STATUS: _____This product is NOT listed as a carcinogen or suspected carcinogen by NTP, IARC, ACGIH, or OSHA.

MEDICAL CONDITIONS AGGRAVATED: None known.

EFFECTS OF OVEREXPOSURE:

ACUTE:

Page 4 of 7

Inhalation: Monochlorobenzene (MCB) is a central nervous system depressant. Inhalation at concentrations in excess of the OSHA permissible exposure limit can cause headache, dizziness, eye, nose and throat irritation, nausea, feeling of drunkenness, unconsciousness and even death in confined or poorly ventilated areas. The available scientific literature indicates that severe inhalation overexposure may result in liver and kidney injury.

Eye/Skin: Animal studies and human experience indicate that short exposures can result in minor eye and skin irritation and pain; however, prolonged or repeated contact may result in mild skin burns. May be absorbed through the skin.

Ingestion: Although swallowing is not a likely route of exposure in industrial applications, accidental ingestion of large quantities of MCB can cause illness similar to those described above for inhalation. Small amounts of this product aspirated into the respiratory system during ingestion or vomiting may cause mild to severe pulmonary injury, including death.

CHRONIC:

Various long-term MCB studies (inhalation and ingestion) involving several species of experimental animals have reported changes in the liver, kidneys, and blood.

Monochlorobenzene was administered to mice and rats at daily oral dosage of 60, 125, 250, 500 and 750 mg/kg for 5 days/week in a three-month toxicity study conducted by the National Toxicology Program. Doses of 250 mg/kg or higher caused reduced body weights and/or decreased survival. Changes in clinical chemistry, hematology, urine chemistry and/or organ weights were observed in rats. Organ weight changes were observed in mice at doses of 250 mg/kg or higher. Dose-related hepatocellular necrosis was observed in both rats and mice. Lymphoid or myeloid depletion of the bone marrow, thymus and spleen and nephrotoxicity were observed at or above doses of 250 mg/kg in mice and 500 mg/kg in rats.

In a chronic bioassay conducted by the National Toxicology Program, daily oral doses (5 days/week for 103 weeks) of 60 or 120 mg/kg were administered to male and female rats and female mice and to male mice at doses of 30 or 60 mg/kg. Decreased survival and neoplastic nodules of the liver were observed in high-dose male rats but no increase in nodules or tumor incidence was reported in female rats or male or female mice. No lymphoid or myeloid depletion of bone marrow, thymus or spleen was observed, in contrast to the 90-day study results. No non-neoplastic lesions were clearly attributable to monochlorobenzene.

In an inhalation (50, 150, and 450 ppm) two-generation reproduction study in rats, in the low-dose group, no adverse effects were evident except that the relative liver to body weight ratio was statistically higher than control. In the mid and high-dose groups, no adverse effects were evident in body weight, food consumption, physical observations, reproductive performance or fertility in the adult generations. At sacrifice of the mid and high-dose adults, relative liver weights were higher than control. Microscopic examination of tissues for F0 and F1 adults revealed hepatocellular hypertrophy and degenerative and inflammatory renal lesions and an increase in the incidence of testicular degenerative changes in the high-dose males and in the F1 mid-dose males. No adverse effects were evident from the evaluation of pups delivered, nursed, and weaned to these same females.

07/02/2 PPG: 0029 Monc ,₁orobenzene

Although results of chronic animal studies are indicative of potential adverse effects in humans, these effects have not been observed in humans.

Other studies have shown monochlorobenzene to be without teratogenic (birth defects) or mutagenic effects.

12. ECOLOGICAL INFORMATION

ECOTOXICOLOGICAL INFORMATION:

LC50: 16.9 mg/L (96-hour, fathead minnow, flow-through). Moderate toxicity.

LC50: 4.1 mg/L (48-hour, rainbow trout). High toxicity.

LC50: 16 mg/L (96-hour, bluegill). Moderate toxicity.

13. DISPOSAL CONSIDERATIONS

DISPOSAL METHOD:

Waste material must be disposed of in accordance with federal, state, provincial, and local environmental control regulations. Empty containers should be recycled or disposed of through an approved waste management facility.

1. Product and Company Identification

Product Name:

MONDUR MR

Material Number:

1668440

Chemical Family:

Aromatic Isocyanate

Chemical Name:

Polymeric Diphenylmethane Diisocyanate (pMDI)

CAS-No.:

9016-87-9

2. Hazards Identification

Emergency Overview

WARNING! Color: Dark brown, Black Form: liquid Odor: musty.

Toxic gases/fumes may be given off during burning or thermal decomposition. Closed container may forcibly rupture under extreme heat or when contents have been contaminated with water. Use cold water spray to cool fire-exposed containers to minimize the risk of rupture. Causes respiratory tract irritation. May cause allergic respiratory reaction. Harmful if inhaled. Respiratory sensitizer. Lung damage and respiratory sensitization may be permanent. Causes skin irritation. May cause allergic skin reaction. Skin sensitizer. Animal tests indicate that skin contact alone may lead to allergic respiratory reaction. Causes eye irritation. May cause lung damage.

Potential Health Effects

Primary Routes of Entry:

Skin Contact, Inhalation, Eye Contact

Medical Conditions Aggravated by

Asthma, Respiratory disorders, Skin Allergies, Eczema

Exposure:

HUMAN EFFECTS AND SYMPTOMS OF OVEREXPOSURE

Inhalation

Acute Inhalation

For Product: MONDUR MR

Dissocyanate vapors or mist at concentrations above the TLV or PEL can irritate (burning sensation) the mucous membranes in the respiratory tract (nose, throat, lungs) causing runny nose, sore throat, coughing, chest discomfort, shortness of breath and reduced lung function (breathing obstruction). Persons with a

Material Name: MONDUR MR

Article Number: 1668440

Page: 1 of 11 Report Version: 1.9

preexisting, nonspecific bronchial hyperreactivity can respond to concentrations below the TLV or PEL with similar symptoms as well as asthma attack or asthma-like symptoms. Exposure well above the TLV or PEL may lead to bronchitis, bronchial spasm and pulmonary edema (fluid in lungs). Chemical or hypersensitivity pneumonitis, with flu-like symptoms (e.g., fever, chills), has also been reported. These symptoms can be delayed up to several hours after exposure. These effects are usually reversible.

Chronic Inhalation

For Product: MONDUR MR

As a result of previous repeated overexposures or a single large dose, certain individuals may develop sensitization to diisocyanates (asthma or asthma-like symptoms) that may cause them to react to a later exposure to diisocyanates at levels well below the TLV or PEL. These symptoms, which can include chest tightness, wheezing, cough, shortness of breath or asthmatic attack, could be immediate or delayed up to several hours after exposure. Extreme asthmatic reactions can be life threatening. Similar to many non-specific asthmatic responses, there are reports that once sensitized an individual can experience these symptoms upon exposure to dust, cold air or other irritants. This increased lung sensitivity can persist for weeks and in severe cases for several years. Sensitization can be permanent. Chronic overexposure to diisocyanates has also been reported to cause lung damage (including fibrosis, decrease in lung function) that may be permanent.

Skin

Acute Skin

For Product: MONDUR MR

Causes irritation with symptoms of reddening, itching, and swelling. Persons previously sensitized can experience allergic skin reaction with symptoms of reddening, itching, swelling, and rash. Cured material is difficult to remove. Contact with MDI can cause discoloration.

Chronic Skin

For Product: MONDUR MR

Prolonged contact can cause reddening, swelling, rash, and, in some cases, skin sensitization. Animal tests on MDI indicate skin contact alone may lead to an allergic respiratory reaction.

Eye

Acute Eye

For Product: MONDUR MR

Causes irritation with symptoms of reddening, tearing, stinging, and swelling. May cause temporary corneal injury. Vapor or aerosol may cause irritation with symptoms of burning and tearing.

Chronic Eve

For Product: MONDUR MR

Prolonged vapor contact may cause conjuntivitis.

Ingestion

Acute Ingestion

For Product: MONDUR MR

May cause irritation; Symptoms may include abdominal pain, nausea, vomiting, and diarrhea.

Carcinogenicity:

No Carcinogenic substances as defined by IARC, NTP and/or OSHA

3. Composition/Information on Ingredients

Hazardous Components

Weight %

Mixed Isomers

4. First Aid Measures

Eye Contact

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Use lukewarm water if possible. Use fingers to ensure that eyelids are separated and that the eye is being irrigated. Get medical attention.

Skin Contact

Immediately remove contaminated clothing and shoes. Wash off with soap and water. Use lukewarm water if possible. Wash contaminated clothing before reuse. For severe exposures, immediately get under safety shower and begin rinsing. Get medical attention if irritation develops.

Inhalation

Move to an area free from further exposure. Get medical attention immediately. Administer oxygen or artificial respiration as needed. Asthmatic symptoms may develop and may be immediate or delayed up to several hours. Extreme asthmatic reactions can be life threatening.

Ingestion

Do not induce vomiting. Wash mouth out with water. Do not give anything by mouth to an unconscious person. Get medical attention.

Notes to physician

Eyes: Stain for evidence of corneal injury. If cornea is burned, instill antibiotic/steroid preparation as needed. Workplace vapors could produce reversible corneal epithelial edema impairing vision. Skin: This compound is a skin sensitizer. Treat symptomatically as for contact dermatitis or thermal burn. Ingestion: Treat symptomatically. There is no specific antidote. Inducing vomiting is contraindicated because of the irritating nature of the compound. Inhalation: Treatment is essentially symptomatic. An individual having a dermal or pulmonary sensitization reaction to this material should be removed from further exposure to any diisocyanate.

5. Fire-Fighting Measures

Suitable Extinguishing Media:

dry chemical, carbon dioxide (CO2), foam, water spray for large fires.

Special Fire Fighting Procedures

Firefighters should wear NFPA compliant structural firefighting protective equipment, including self-contained breathing apparatus and NFPA compliant helmet, hood, boots and gloves. Avoid contact with product. Decontaminate equipment and protective clothing prior to reuse. During a fire, isocyanate vapors and other irritating, highly toxic gases may be generated by thermal decomposition or combustion. Exposure to heated diisocyanate can be extremely dangerous.

Unusual Fire/Explosion Hazards

Closed container may forcibly rupture under extreme heat or when contents are contaminated with water (CO2 formed). Use cold-water spray to cool fire-exposed containers to minimize the risk of rupture. Large fires can be extinguished with large volumes of water applied from a safe distance, since reaction between water and hot diisocyanate can be vigorous.

Material Name: MONDUR MR Article Number: 1668440

Page: 3 of 11 Report Version: 1.9

6. Accidental release measures

Spill and Leak Procedures

Evacuate non-emergency personnel. Isolate the area and prevent access. Remove ignition sources. Notify management. Put on protective equipment. Control source of the leak. Ventilate. Contain the spill to prevent spread into drains, sewers, water supplies, or soil. Call Bayer at 412-923-1800 for assistance and advice. Major Spill or Leak (Standing liquid): Released material may be pumped into closed, but not sealed, metal container for disposal. Process can generate heat. Minor Spill or Leak (Wet surface): Cover spill area with suitable absorbent material (Kitty Litter, Oil-Dri®, etc). Saturate absorbent material with neutralization solution and mix. Wait 15 minutes. Collect material in open-head metal containers. Repeat applications of decontamination solution, with scrubbing, followed by absorbent until the surface is decontaminated. Check for residual surface contamination. Swype® test kits have been used for this purpose. Apply lid loosely and allow containers to vent for 72 hours to let carbon dioxide (CO2) escape.

Additional Spill Procedures/Neutralization

Neutralization solutions:

- (1) Colorimetric Laboratories Inc. (CLI) decontamination solution.
- (2) A mixture of 75% water, 20% non-ionic surfactant (e.g. Poly-Tergent SL-62, Tergitol TMN-10) and 5% n-propanol.
- (3) A mixture of 80% water, 20% non-ionic surfactant (e.g. Poly-Tergent SL-62, Tergitol TMN-10).
- (4) A mixture of 90% water, 3-8% ammonium hydroxide or concentrated ammonia, and 2% liquid detergent.

Bayer requires that CHEMTREC be immediately notified (800-424-9300) when this product is unintentionally released from its container during its course of distribution, regardless of the amount released. Distribution includes transportation, storage incidental to transportation, loading and unloading. Such notification must be immediate and made by the person having knowledge of the release.

7. Handling and Storage

Storage Temperature:

minimum:

18 °C (64.4 °F)

maximum:

30 °C (86 °F)

Storage Period

6 Months

Handling/Storage Precautions

Do not breathe vapors, mists, or dusts. Use adequate ventilation to keep airborne isocyanate levels below the exposure limits. Wear respiratory protection if material is heated, sprayed, used in a confined space, or if the exposure limit is exceeded. Warning properties (irritation of the eyes, nose and throat or odor) are not adequate to prevent overexposure from inhalation. This material can produce asthmatic sensitization upon either single inhalation exposure to a relatively high concentration or upon repeated inhalation exposures to lower concentrations. Individuals with lung or breathing problems or prior allergic reactions to isocyanates must not be exposed to vapor or spray mist. Avoid contact with skin and eyes. Wear appropriate eye and skin protection. Wash thoroughly after handling. Do not breathe smoke and gases created by overheating or burning this material. Decomposition products can be highly toxic and irritating. Store in tightly closed containers to prevent moisture contamination. Do not reseal if contamination is suspected.

Further Info on Storage Conditions

Employee education and training in the safe use and handling of this product are required under the OSHA

Material Name: MONDUR MR		Article Number: 1668440	
	Page: 4 of 11	Report Version: 1.9	

Hazard Communication Standard 29 CFR 1910.1200.

8. Exposure Controls / Personal Protection

4,4'-Diphenylmethane Diisocyanate (MDI) (101-68-8)

US. ACGIH Threshold Limit Values
Time Weighted Average (TWA): 0.005 ppm
US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)
Ceiling Limit Value: 0.02 ppm, 0.2 mg/m3

Industrial Hygiene/Ventilation Measures

Local exhaust should be used to maintain levels below the TLV whenever MDI is heated, sprayed, or aerosolized. Standard reference sources regarding industrial ventilation (e.g., ACGIH Industrial Ventilation Manual) should be consulted for guidance about adequate ventilation. To ensure that published exposure limits have not been exceeded, monitoring for airborne diisocyanate should become part of the overall employee exposure characterization program. NIOSH, OSHA, Bayer, and others have developed sampling and analytical methods. Bayer methods can be made available, upon request.

Respiratory Protection

Airborne MDI concentrations greater than the ACGIH TLV-TWA (TLV) or OSHA PEL-C (PEL) can occur in inadequately ventilated environments when MDI is sprayed, aerosolized, or heated. In such cases, respiratory protection must be worn. The type of respiratory protection selected must comply with the requirements set forth in OSHA's Respiratory Protection Standard (29 CFR 1910.134). The type of respiratory protection available includes (1) an atmosphere-supplying respirator such as a self-contained breathing apparatus (SCBA) or a supplied air respirator (SAR) in the positive pressure or continuous flow mode, or (2) an air-purifying respirator (APR). If an APR is selected then (a) the cartridge must be equipped with an end-of-service life indicator (ESLI) certified by NIOSH, or(b) a change out schedule, based on objective information or data that will ensure that the cartridges are changed out before the end of their service life, must be developed and implemented. The basis for the change out schedule must be described in the written respirator program. Further, if an APR is selected, the airborne diisocyanate concentration must be no greater than 10 times the TLV or PEL. The recommended APR cartridge is an organic vapor/particulate filter combination cartridge (OV/P100).

Hand Protection

Gloves should be worn., Nitrile rubber showed excellent resistance., Butyl rubber, neoprene and PVC are also effective.

Eye Protection

When directly handling liquid product, eye protection is required. Examples of eye protection include a chemical safety goggle, or chemical safety goggle in combination with a full face shield when there is a greater risk of splash.

Skin and body protection

Avoid all skin contact. Depending on the conditions of use, cover as much of the exposed skin area as possible with appropriate clothing to prevent skin contact.

Medical Surveillance

All applicants who are assigned to an isocyanate work area should undergo a pre-placement medical evaluation. A history of eczema or respiratory allergies such as hay fever, are possible reasons for medical exclusion from isocyanate areas. Applicants who have a history of adult asthma should be restricted from work with isocyanates. Applicants with a history of prior isocyanate sensitization should be excluded from further work with isocyanates. A comprehensive annual medical surveillance program should be instituted for all employees who are potentially exposed to diisocyanates. Once a worker has been diagnosed as sensitized to any isocyanate, no further exposure can be permitted. Refer to the Bayer pamphlet (Medical

Material Name: MONDUR MR Article Number: 1668440

Page: 5 of 11 Report Version: 1.9

Surveillance Program for Isocyanate Workers) for additional guidance.

Additional Protective Measures

Emergency showers and eye wash stations should be available. Educate and train employees in the safe use and handling of this product. Follow all label instructions.

9. Physical and chemical properties

Form:

liquid

Color:

Dark brown, Black

Odor:

musty

Daor: pH:

Not Applicable

Freezing Point:

<0 °C (< 32 °F)

Boiling Point/Range:

Approximately 208 °C (406.4 °F)

Flash Point:

199 °C (390.2 °F) (Pensky-Martens Closed Cup (ASTM D-93))

Vapor Pressure:

< 0.0001 mmHg @ 25 °C (77 °F)

Specific Gravity:

1.24 @ 25 °C (77 °F)

Solubility in Water:

Insoluble - Reacts slowly with water to liberate CO2 gas

Viscosity, Dynamic:

200 cP @ 25 °C (77 °F)

Bulk Density:

10.3 lb/gal

10. Stability and Reactivity

Hazardous Reactions

Contact with moisture, other materials that react with isocyanates, or temperatures above 350 F (177 C), may cause polymerization.

Materials to avoid

Water, Amines, Strong bases, Alcohols, copper alloys

Hazardous decomposition products

By Fire and High Heat: hydrogen cyanide; Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), dense black smoke, Isocyanate, Isocyanic Acid, Other undetermined compounds

11. Toxicological Information

Toxicity Data for MONDUR MR

Toxicity Note

Toxicity data based on polymeric MDI.

Acute Oral Toxicity

LD50: > 2,000 mg/kg (rat, Male/Female)

Acute Inhalation Toxicity

LC50: 490 mg/m3, vapor, 4 h (rat)

Skin Irritation

rabbit, Slightly irritating

Repeated Dose Toxicity

90 Days, inhalation: NOAEL: 1 mg/m3, (rat, Male/Female, 6 hrs/day 5 days/week) Irritation to lungs and nasal cavity.

Material Name: MONDUR MR

Article Number: 1668440

Page: 6 of 11 Report Version: 1.9

2 years, inhalation: NOAEL: 0.2 mg/m3, (rat, Male/Female, 6 hrs/day 5 days/week) Irritation to lungs and nasal cavity.

Mutagenicity

Genetic Toxicity in Vitro:

Bacterial - gene mutation assay: negative (Salmonella typhimurium, Metabolic Activation: with/without)

Carcinogenicity

rat, Male/Female, inhalation, 2 Years, 6 hrs/day 5 days/week

Exposure to a level of 6 mg/m3 polymeric MDI was related to the occurrence of lung tumors. This level is significantly over the TLV for MDI.

Developmental Toxicity/Teratogenicity

rat, female, inhalation, gestation days 6-15, 6 hrs/day, NOAEL (teratogenicity): 12 mg/m3, NOAEL

(maternal): 4 mg/m3

No Teratogenic effects observed at doses tested. Fetotoxicity seen only with maternal toxicity.

Toxicity Data for 4,4'-Diphenylmethane Diisocyanate (MDI)

Acute Inhalation Toxicity

LC50: 369 mg/m3, 4 hrs (rat, Male/Female)

LC50: > 2240 mg/m3, aerosol, 1 h (rat)

Acute dermal toxicity

LD50: > 10,000 mg/kg (rabbit)

Skin Irritation

rabbit, Draize Test, Slightly irritating

Eye Irritation

rabbit, Draize Test, Slightly irritating

Sensitization

dermal: sensitizer (guinea pig, Maximisation Test (GPMT))

inhalation: sensitizer (Guinea pig)

Repeated Dose Toxicity

90 Days, inhalation: NOAEL: 0.3 mg/m3, (rat, Male/Female, 18 hrs/day, 5 days/week)

Irritation to lungs and nasal cavity.

Mutagenicity

Genetic Toxicity in Vitro:

Ames: (Salmonella typhimurium, Metabolic Activation: with/without)

Positive and negative results were reported. The use of certain solvents which rapidly hydrolyze

diisocyanates is suspected of producing the positive mutagenicity results.

Genetic Toxicity in Vivo:

Micronucleus Assay: negative (mouse)

Carcinogenicity

rat, Female, inhalation, 2 Years, 17 hrs/day, 5 days/week

negative

12. Ecological Information

Veolia ES Technical Solutions, L.L.C. Federal EPA ID: TXD000838896 State EPA ID: 50212-001 Highway 73, 3.5 miles W. of Taylor's Bayou Bridge Port Arthur, TX 77643

CES ENVIRONMENTAL INC ATTN: MANIFEST SECTION TXD008950461 4904 GRIGGS RD HOUSTON, TX 77021

CERTIFICATE OF DESTRUCTION

(409) 736-2821

Veolia ES Technical Solutions, L.L.C. has received waste material from CES ENVIRONMENTAL INC on 3/7/2008 as described on [State Manifest or Uniform] Hazardous Waste Manifest number 4013270JJK.

Sequence 1

Profile Number:

DSSX03

Veolia Tracking ID:

610045-01

Veolia Unit ID

Treatment Date

1 2

3/29/2008

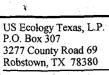

3/29/2008

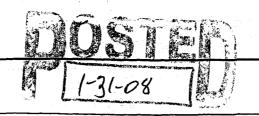

I certify, on behalf of the above listed treatment facility, that to the best of my knowledge, the above-described waste was managed in compliance with all applicable laws, regulations, permits, and licenses on the date listed above. Management of wastes includes pretreatment blending and subsequent incineration per standardized handling code H040, "Incineration – thermal destruction other than use as fuel", reference 40 CFR Part 262, Appendix Item 19, (TCEQ 30 TAC § 335.10).

Subject: Centrifuge Sludge

Hi Ryan,

We have an approval on the drums of benzene. 09-005-6644. Looks like Kevin already gave you pricing at \$200.00 per drum.

Please let me know if you need anything additional. Thank you for the opportunity!

Jill Albert

Subject: D018

Ryan,

Thank you for the opportunity to provide pricing to CES Environmental for the treatment and disposal of benzene (D018) contaminated sludge from Houston.

US Ecology Texas proposes to treat and dispose of the benzene sludge at our fully permitted RCRA hazardous waste treatment and landfill facility at Robstown, Texas.

The following pricing is available to CES. A completed profile form must be submitted for approval prior to shipment. A sample will not be required.

Treatment and disposal of D018 sludge

\$200.00/drum

State of Texas waste tax

\$8.00/ton

Energy surcharge

6%

US Ecology looks forward to working with CES on this material. Please call with any questions.

Regards,

Kevin R. Wittmer Regional Sales Manager US Ecology, Inc. (800) 955-3265 - office (502) 599-1717 - cell (502) 425-8815 - fax kwittmer@americanecology.com

S	ECTION F – U.S. DOT SHIPPING DESCRIPTION
1. 3. 4. 7.	(Note - Shipper is responsible for correctness of this information) Hazardous Material? ■Yes, □No 2. RQ Required: ■Yes, □No, □N/A. If yes, give RQ amount: 10 Proper D.O.T. Shipping Name: Hazardous waste, liquid, n.o.s. Hazard Class: 9 5. UN/NA NA 3082 6. Packaging Group: PG III Additional Description: contains benzene
S	ECTION G - CERTIFICATION
1.	Has this waste been treated (per 40 CFR 260.10) after the initial point of generation as a waste? Yes, No (If No, go to 2) 1a. Indicate treatment method: Solidification, Stabilization, Other: 1b. If solidified or stabilized list all additives:
2.	Per the requirements of 40 CFR 264.1080 (Subpart CC), at the point of generation, does this waste contain less than 500 ppm VOCs? Yes, No N/A.
3.	The total 40 CFR 268, Appendix III Halogenated Organic Compounds present in this waste, as shipped to Facilities are at the following levels? None Present, 0 to 99 mg/kg, 100 to 499 mg/kg, 500 to 999 mg/kg, >1000 mg/kg
4.	Is this waste, or the generating facility, subject to regulation under 40 CFR Part 61 Subpart FF (Benzene Rule) of NESHAPS (S8 FR No. 4 - 1/17/93) (Note: Waste generated from chemical manufacturing, coke-by-product recovery plants, petroleum refineries or treaters of such waste are subject to these requirements). Yes, No
5.	Is the waste restricted under the Land Disposal Restrictions under federal rules of 40 CFR 268. Yes No (If yes, please answer the following:) 5a. Treatment Sub-category: Wastewater (<1 % TSS and <1% TOC), Non-wastewater, Debris 5b. I certify that this material may be directly land disposed without further treatment. Yes, No If yes, specify: Meets numerical BDAT treatment standards by analysis, which are attached. Material or debris has been treated by this technology from 40 CFR 268.42: Material is subject to a variance or extension as specified: 5c. Per 40 CFR 268.2(i) and 268.7(a) there are "underlying hazardous constituents" (UHC) applicable from the UTS list under 40 CFR 268.48. Yes, No If Yes, list UHCs: Benzene
6.	GENERATOR CERTIFICATION STATEMENTS A. For Solids for Direct Burial at Facility: 1. The waste was initially generated as a solid material containing no free liquid. OR— 2. The waste was initially generated as a liquid or waste containing free liquids. The waste has been treated to eliminate free liquids in compliance with Section 3004 (c) of the Resource Conservation and Recovery Act (RCRA) of 1976, as amended by the Hazardous and Solid Waste Amendments of 1984. The materials used in the treatment process do not biodegrade or release liquids when compressed. The treatment process utilized (for bulk waste) did not employ the addition of absorbents to the waste (unless used in a stabilization process). B. Certification Statement: I hereby certify that as an authorized representative of the generator named above, all information submitted in this and all the attached document are true and accurate. Pre-shipment and all other samples provided are a true representative sample of the waste and were sampled in accordance with 40 CFR Part 261.20. Any analysis of the waste was conducted in accordance with the approved test methods in 40 CFR Part 261 on a
	representative sample as defined in 40 CFR Part 261.20. To the best of my knowledge, all known (40 CFR Part 261/OSHA/NESHAP) and suspected hazardous components have been included in this documentation. All material, descriptions, and packaging will comply with all current regulations. SIGNATURE: President DATE: 05/22/2007

TECHNICAL AND TRANSPORTATION REQUIREMENTS ADDENDUM TO WASTE TRANSPORTATION AND DISPOSAL AGREEMENT

Page 1 of 1

Addendum #: 58 Contract #: T03053

TECHNICAL REQUIREMENTS

- Customer must have a confirmed scheduled delivery date & time three (3) days prior to ship date. Please contact the Company Customer Service
 Department during regular operating hours Monday Friday for an appointment time.
- The Waste Stream Identification Number (WSID) must appear on each manifest paper required by EPA or DOT. Waste shipped in drums, bags, or boxes must have the WSID clearly marked on the top and one side of each container.
- Bulk trucks, intermodal boxes, and roll-off boxes must be lined and self-unloading by their own equipment. If the waste does not self-unload, the
 container will be unloaded utilizing excavators or other appropriate equipment at an additional charge and Company assumes no liability for damage to
 tractor, truck beds, intermodal boxes, roll-off boxes, or associated equipment.
- Company does not provide decontamination of trucks or other containers and will not provide certification for decontamination unless requested (additional charges will apply). With prior approval and at additional Customer cost, tanker trucks can be rinsed out with water if the material can be easily removed.
- Drivers delivering material to Company must be clean shaven and have all required PPE (appropriate respirators & cartridges, eye protection, foot
 protection, & disposable protective outer garments) and abide by all DOT, OSHA, and Company safety policies. Please contact your Customer Service
 Representative if you need assistance on appropriate PPE.
- 6. Waste identified as having non-regulated light ballasts and capacitors are subject to the following: Company must give prior approval and each individual item must have manufacturer markings identifying the item as being non-PCB. Otherwise, Company may consider all PCB light ballasts and small capacitors to be TSCA regulated.
- 7. Containerized waste must be shipped in DOT approved containers, and subject to the following requirements: Drums must weigh less than 800 lbs.; Bags must be toad rated, double stitched, equipped with integral lift straps, and weigh less than 5,600 lbs.; palletized boxes exceeding 36 inches in any dimension will be subject to surcharge and must weigh less than 2,800 lbs. Non-metal drums may require additional charges. Friable Asbestos must be double bagged, wetted and labeled per the requirements of 40 CFR Part 61, Subpart M. All NESHAPS information must be recorded on the manifest. Floor dry may be added to avoid the formation of free liquids. Debris requiring treatment: must meet the definition in 40 CFR §268.2, must not be individually packaged and must be self-unloading if bulk shipped.

TRANSPORTATION TERMS & CONDITIONS

- 1. All transportation taxes and fees are the responsibility of the Customer and will be billed as a separate item, if not already included in the quoted rate.
- 2. Any fuel surcharges added by transporter(s) are the responsibility of the Customer and will be included on Company invoices
- Customer is responsible for proper loading, lining, tarping and weighing of vehicles or rail cars. Any overloads or subsequent costs from overloads are the responsibility of the Customer.
- 4. Customer is responsible for proper manifesting, marking, labeling, and placarding as required by law
- Customer is responsible for payment of demurrage and transportation delay costs other than those caused by the Transporter or Company, its agents, servants, or employees
- 6. Customer is responsible for proper and safe handling of all rail containers, gondolas or other transportation equipment while on the Customer's site.
- Customer is responsible for payments of costs for damage to equipment caused by Customer and/or its contractors, agents or employees. Customer
 must notify Company of any damage to equipment caused by Company prior to leaving Company's facilities. Claims made after departure cannot be
 verified or paid.
- Unless otherwise specified, truck shipments will be subject to 1 hour loading and 1 hour unloading free time; Customer will be charged per hour for delays beyond the allowed free time.
- All costs incurred by Company as a result of the failure of Customer to perform or adhere to the foregoing responsibilities and requirements will be due
 and payable by Customer to Company
- 10. Customer is responsible for payment at the rates specified herein for any equipment provided by Company pursuant to this Addendum, but not used. Intermodal and roll-off containers will be charged at the same rate as if the container was fully loaded with a minimum of 20 tons, or the rated container capacity, whichever is more. Standard end-dump trucks will be charged as if fully loaded with 22 tons. Truck & pup units will be charged as if loaded with 30 tons.

ADDTIONAL RAIL TERM & CONDITIONS

- 1. Gondolas with a legal gross capacity of 286,000 lbs will be subject to a minimum payload of 105 tons. Gondolas with a legal gross capacity of 263,000 lbs will be subject to a minimum payload of 96 tons.
- If gondola cars are ordered and not used, they may be billed as if they were full with 106 tons each. If gondola cars are ordered and not shipped within 30 days, the gondola cars will need to be released and reordered if needed for other projects
- 3. Waste shipped in boxcars or trailers must be packaged in drums, boxes or other sultable containment and be properly blocked and braced for shipment.
- 4. Five free days will be allowed for gondolas once the equipment is spotted at the project site or Customer has been notified that empty equipment can be delivered to the project site. Demurrage is \$60 per day per railcar and will be assessed in the event gondola loading has not started within 5 days of the date for which cars were ordered and placed. This fee will continue on a daily basis until gondolas are loaded and released for shipment.
- 5. Fuel adjustment surcharges will be billed based on the servicing railroad's index (i.e. per gallon of diesel fuel, or per barrel of West Texas Intermediate Crude Oil) and charged directly to Customer.
- 6. Request for rail equipment must be made in writing by Customer prior to the shipment for placement of empty gondolas.

TECHNICAL AND TRANSPORTATION REQUIREMENTS ADDENDUM TO WASTE TRANSPORTATION AND DISPOSAL AGREEMENT

Page 1 of 1

Addendum #: 111 Contract #: T03053

TECHNICAL REQUIREMENTS

- Customer must have a confirmed scheduled delivery date & time three (3) days prior to ship date. Please contact the Company Customer Service Department during regular operating hours Monday - Friday for an appointment time.
- The Waste Stream Identification Number (WSID) must appear on each manifest paper required by EPA or DOT. Waste shipped in drums, bags, or boxes must have the WSID clearly marked on the top and one side of each container.
- Bulk trucks, intermodal boxes, and roll-off boxes must be lined and self-unloading by their own equipment. If the waste does not self-unload, the
 container will be unloaded utilizing excavators or other appropriate equipment at an additional charge and Company assumes no liability for damage to
 tractor, truck beds, intermodal boxes, roll-off boxes, or associated equipment.
- 4. Company does not provide decontamination of trucks or other containers and will not provide certification for decontamination unless requested (additional charges will apply). With prior approval and at additional Customer cost, tanker trucks can be rinsed out with water if the material can be easily removed.
- 5. Drivers delivering material to Company must be clean shaven and have all required PPE (appropriate respirators & cartridges, eye protection, foot protection, & disposable protective outer garments) and abide by all DOT, OSHA, and Company safety policies. Please contact your Customer Service Representative if you need assistance on appropriate PPE.
- 6. Waste identified as having non-regulated light ballasts and capacitors are subject to the following: Company must give prior approval and each individual item must have manufacturer markings identifying the item as being non-PCB. Otherwise, Company may consider all PCB light ballasts and small capacitors to be TSCA regulated.
- 7. Containerized waste must be shipped in DOT approved containers, and subject to the following requirements: Drums must weigh less than 800 lbs.; Bags must be load rated, double stitched, equipped with integral lift straps, and weigh less than 5,600 lbs.; palletized boxes exceeding 36 inches in any dimension will be subject to surcharge and must weigh less than 2,800 lbs. Non-metal drums may require additional charges. Friable Asbestos must be double bagged, wetted and labeled per the requirements of 40 CFR Part 61, Subpart M. All NESHAPS information must be recorded on the manifest. Floor dry may be added to avoid the formation of free liquids. Debris requiring treatment: must meet the definition in 40 CFR §268.2, must not be individually packaged and must be self-unloading if bulk shipped.

TRANSPORTATION TERMS & CONDITIONS

- 1. All transportation taxes and fees are the responsibility of the Customer and will be billed as a separate item, if not already included in the quoted rate.
- 2. Any fuel surcharges added by transporter(s) are the responsibility of the Customer and will be included on Company invoices
- Customer is responsible for proper loading, lining, tarping and weighing of vehicles or rail cars. Any overloads or subsequent costs from overloads are the responsibility of the Customer.
- 4. Customer is responsible for proper manifesting, marking, labeling, and placarding as required by law
- 5. Customer is responsible for payment of demurrage and transportation delay costs other than those caused by the Transporter or Company, its agents, servants, or employees
- 6. Customer is responsible for proper and safe handling of all rail containers, gondolas or other transportation equipment while on the Customer's site.
- 7. Customer is responsible for payments of costs for damage to equipment caused by Customer and/or its contractors, agents or employees. Customer must notify Company of any damage to equipment caused by Company prior to leaving Company's facilities. Claims made after departure cannot be verified or paid
- 8. Unless otherwise specified, truck shipments will be subject to 1 hour loading and 1 hour unloading free time; Customer will be charged per hour for delays beyond the allowed free time.
- All costs incurred by Company as a result of the failure of Customer to perform or adhere to the foregoing responsibilities and requirements will be due
 and payable by Customer to Company
- 10. Customer is responsible for payment at the rates specified herein for any equipment provided by Company pursuant to this Addendum, but not used. Intermodal and roll-off containers will be charged at the same rate as if the container was fully loaded with a minimum of 20 tons, or the rated container capacity, whichever is more. Standard end-dump trucks will be charged as if fully loaded with 22 tons. Truck & pup units will be charged as if loaded with 30 tons.

ADDTIONAL RAIL TERM & CONDITIONS

- 1. Gondolas with a legal gross capacity of 286,000 lbs will be subject to a minimum payload of 105 tons. Gondolas with a legal gross capacity of 263,000 lbs will be subject to a minimum payload of 96 tons.
- If gondola cars are ordered and not used, they may be billed as if they were full with 106 tons each. If gondola cars are ordered and not shipped within 30 days, the gondola cars will need to be released and reordered if needed for other projects
- 3. Waste shipped in boxcars or trailers must be packaged in drums, boxes or other suitable containment and be properly blocked and braced for shipment.
- 4. Five free days will be allowed for gondolas once the equipment is spotted at the project site or Customer has been notified that empty equipment can be delivered to the project site. Demurrage is \$60 per day per railcar and will be assessed in the event gondola loading has not started within 5 days of the date for which cars were ordered and placed. This fee will continue on a daily basis until gondolas are loaded and released for shipment.
- Fuel adjustment surcharges will be billed based on the servicing railroad's index (i.e. per gallon of diesel fuel, or per barrel of West Texas Intermediate Crude Oil) and charged directly to Customer.
- 6. Request for rail equipment must be made in writing by Customer prior to the shipment for placement of empty gondolas.

QUOTATION FOR DISPOSAL

July 25, 2006

Mr. Matt Bowman CES Environmental Services, Inc. 4904 Griggs Road Houston, TX 77021

Mr. Matt Bowman,

Thank you for considering Rineco Chemical as your innovative waste management company. Based on the information provided, Rineco is pleased to offer the following quotation for your approval. Prices subject to change with 30 day notice.

Control #
0607-09290Waste Name
Waste Mondur with MonochlorobenzeneContainer
Bulk or CYBDisposal Price
\$0.45/lb.\$175 min Cubic Yard Box
No Min for Bulk Loads

At no extra charge, RINECO will prepare manifest and labels, which will be shipped overnight. We appreciate the opportunity to service your waste disposal needs. If you have any questions, please call 800-377-4692.

Michael Jaskowiak South Texas Territory Manager

Waste Stream Name: HAZARDOUS DEBRIS

Expiration Date

: 03/17/2005

Dear Dan Bowman.

Due to our policy of reviewing each waste streatn for disposal at our Robstown, TX facility on an annual basis, please review the attached copy of your Waste Product Questionnaire (WPQ) form for the above referenced waste stream.

If there are no changes in the waste classification as hazardous/non-hazardous, the waste characteristics and components, the generating process, the waste stream name, or any other section of the WDI form please sign in the appropriate space below and return to me. If the waste classification is hazardous/non-hazardous, and the waste characteristics or generating process has changed, please advise us of these changes in a separate letter.

Please supply the following items for the renewal process.

Annual Certification of LDR (a copy is attached)

Updated

WPQ (due to new software program, PLEASE COMPLETE EACH SECTION, SIGN, DATE

AND RETURN)

Waste Streams CANNOT be renewed nor waste accepted unless all information is updated and returned!

[]	Reshipment sample for collaborated testing per 40 CFR 268.7(b)3 or 268.7(c)2
[]	Current analytical (<i old)<="" td="" year=""></i>
[]	MSDS

Current TNRCC Waste Code #

Please be aware that while there may have been no changes to your waste stream file, our technical review staff may be required to contact

you for additional information due to changes in federal and state regulations or company policy. In order to keep your waste stream approval current, we request our response as soon as possible. If you have any questions, please do not hesitate to call me at 1-800-242-3209. Thank you for your cooperation. Sincerely, CUSTOMER SERVICE Please indicate your wish to renew W/S # 090047956-0 as described above. Indicate your wish not to continue the renewal of your W/S# 090047956-0 due to: [] Waste no longer generated [] Other Date 6-13.00 Authorized Signature Please return to: Jill Albert, P.O. Box 307, Robstown, TX 78380, Fax # (361)387-0794

1. 3.	(Note - Shipper is responsible for correctness of this information) Hazardous Material? ■ Yes, □ No 2. RQ Required: □ Yes, ■ No, □ N/A. If yes, give RQ amount: Proper D.O.T. Shipping Name: Hazardous waste, liquid, n.o.s. (benzene)
4. 7.	Hazard Class: 9 5. UN/NA UN3082 6. Packaging Group: PG III Additional Description: Benzene
S	ECTION G – CERTIFICATION
1.	Has this waste been treated (per 40 CFR 260.10) after the initial point of generation as a waste? Yes, No (If No, go to 2) 1a. Indicate treatment method: Solidification, Stabilization, Other: 1b. If solidified or stabilized list all additives:
2.	Per the requirements of 40 CFR 264.1080 (Subpart CC), at the point of generation, does this waste contain less than 500 ppm VOCs? Yes, No NA.
3.	The total 40 CFR 268, Appendix III Halogenated Organic Compounds present in this waste, as shipped to Facilities are at the following levels? None Present, 0 to 99 mg/kg, 100 to 499 mg/kg, 500 to 999 mg/kg, >1000 mg/kg
4.	Is this waste, or the generating facility, subject to regulation under 40 CFR Part 61 Subpart FF (Benzene Rule) of NESHAPS (S8 FR No. 4 - 1/7/93) (Note: Waste generated from chemical manufacturing, coke-by-product recovery plants, petroleum refineries or treaters of such waste are subject to these requirements). Yes, No
5.	Is the waste restricted under the Land Disposal Restrictions under federal rules of 40 CFR 268. Yes No (If yes, please answer the following:) 5a. Treatment Sub-category: Wastewater (<1 % TSS and <1% TOC). Non-wastewater, Debris
	5b. I certify that this material may be directly land disposed without further treatment. If yes, specify: Meets numerical BDAT treatment standards by analysis, which are attached. Material or debris has been treated by this technology from 40 CFR 268.42: Material is subject to a variance or extension as specified: 5c. Per 40 CFR 268.2(i) and 268.7(a) there are "underlying hazardous constituents" (UHC) applicable from the UTS list under 40 CFR 268.48. Tyes, No If Yes, list UHCs: Benzene
6.	GENERATOR CERTIFICATION STATEMENTS A. For Solids for Direct Burial at Facility: 1. The waste was initially generated as a solid material containing no free liquid. — OR — 2. The waste was initially generated as a liquid or waste containing free liquids. The waste has been treated to eliminate free liquids in compliance with Section 3004 (c) of the Resource Conservation and Recovery Act (RCRA) of 1976, as amended by the Hazardous and Solid Waste Amendments of 1984. The materials used in the treatment process do not biodegrade or release liquids when compressed. The treatment process utilized (for bulk waste) did not employ the addition of absorbents to the waste (unless used in a stabilization process).
	B. Certification Statement: I hereby certify that as an authorized representative of the generator named above, all information submitted in this and all the attached document are true and accurate. Pre-shipment and all other samples provided are a true representative sample of the waste and were sampled in accordance with 40 CFR Part 261.20. Any analysis of the waste was conducted in accordance with the approved test methods in 40 CFR Part 261 on a representative sample as defined in 40 CFR Part 261.20. To the best of my knowledge, all known (40 CFR Part 261/OSHA/NESHAP) and suspected hazardous components have been included in this documentation. All material, descriptions, and packaging will comply with all current regulations.

Dear Dan Bowman,

Your Waste Stream Disposal Information form for the above waste stream has been approved.

Under conditions of our operating permit, US Ecology Texas, L.P. is required to inform you that we have all the appropriate permits in order to manage your waste stream. We have received the requisite permits to operate a TSD facility. Our TCEQ permit was renewed on December 2, 1999 and our permit number is HW-50052.

The Texas Uniform Hazardous Waste Manifest (TRNCC Form 0311), appropriate LDR form/certification and Truck Inventory Sheet (if shipping in drums) must accompany each shipment. To obtain a supply of manifest, you may write:

Texas Commission on Environmental Quality (TCEQ)

P.O. Box 13087 - Capitol Station

Austin, Texas 78711

Please notify the Texas facility at (800)242-3209 at least 48 hours prior to shipment and provide the facility with the following information:

- Date of Shipment
- Date of Delivery
- U.S. EPA Generator ID Number
- Waste Stream Number(s)
- Total quantity of each waste stream number being shipped

ufer Evens

Any shipment arriving at the facility without prior scheduling and/or all the appropriate paperwork will be subject to rejection.

Should you have any questions, please contact your US Ecology Texas, L.P. Technical Sales Representative at (800) 242-3209. Please refer to the US Ecology Texas, L.P. waste stream number above when making inquiries.

Sincerely,

JENNIFER EVANS

Dear Gary Brauchman.

Your Waste Stream Disposal Information form for the above waste stream has been approved.

Under conditions of our operating permit, US Ecology Texas, Inc. is required to inform you that we have all the appropriate permits in order to manage your waste stream. We have received the requisite permits to operate a TSD facility. Our TCEQ permit was renewed on December 2, 1999 and our permit number is HW-50052.

The EPA Uniform Hazardous Waste Manifest (EPA Form 8700-22), appropriate LDR form/certification and Truck Inventory Sheet (if shipping in drums) must accompany each shipment. To obtain manifest, Please visit the EPA website for an approved vendor list

Please notify the Texas facility at (800)242-3209 at least 48 hours prior to shipment and provide the facility with the following information:

- Date of Shipment
- Date of Delivery
- U.S. EPA Generator ID Number
- Waste Stream Number(s)
- Total quantity of each waste stream number being shipped

Any shipment arriving at the facility without prior scheduling and/or all the appropriate paperwork will be subject to rejection.

Should you have any questions, please contact your US Ecology Texas, Inc. Technical Sales Representative at (800) 242-3209. Please refer to the US Ecology Texas, Inc. waste stream number above when making inquiries.

Sincerely,

NICOLE SCHMALSTIEG

^		Postrioted Wests Mosts Treatment Standards (40 CER 269 7(s) (2))
A.	لسا	Restricted Waste Meets Treatment Standards (40 CFR 268.7(a) (3)). The restricted waste identified above meets the treatment standards in 40 CFR 268.40 or Alturnitive LDR treatment standards for contaminated soil 40CFR268.49 and can be landfill disposed without further treatment. I have attached all supporting analytical data, where available.
		I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D. I believe that the information I submitted is true, accurate and complete. I am
		aware that there are significant penalties for submitting a false certification, including the possibility of a fine and
В.	П	imprisonment. Restricted Waste Treated To Treatment Standards (40 CFR 268.7(b) (I) & 268.7 (b) (2))
٥.	لسا	The treatment residue, or extract of such residue, or the restricted waste identified above has been tested to assure that the
		treatment residues or extract meet all applicable treatment standards in 40 CFR 268.40 and/or performance standards in 40 CFR 268.45. I have attached all supporting analytical data, where available.
		I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing
		or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D. I believe that the information I submitted is true, accurate and complete. I am
		aware that there are significant penalties for submitting a false certification, including the possibility of a fine and
	_	imprisonment.
C.		Restricted Waste With Technology Based Treatment Standards (40 CFR 268.7(b) (4)) I certify under penalty of law that I personally have examined and am familiar with the treatment technology and operation
		of the treatment process used to support this certification and that based on my inquiry of those individuals immediately
		responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the treatment standards specified in 40 CFR 268.40, without impermissible dilution of the
		prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the
_		possibility of a fine and imprisonment.
D.	Ш	Resticted Waste Decharacterized But Requires Treatment For UHC (40 CFR 268.9) I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the
		hazardous characteristic. This decharacterized waste contains Underlying Hazardous Constituents (UHC) that require further
		treatment to meet the universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
		Complete LDR Attachment 2 for UHC.
E.		Restricted Waste Subject To Treatment (40 CFR 268.7(a) (2)) The restricted waste identified above must be treated to the applicable treatment standards in 40 CFR 268.40, or treated to comply
		with applicable prohibitions set forth in Part 268.32 or RCRA Section 3004(d). I have attached all supporting analytical data, where available.
F.		Hazardous Debris Subject To Treatment (40 CFR 268.45)
		This hazardous debris identified above must be treated to the alternative treatment standards in 40 CFR 268.45.
G.		Restricted Waste Subject To A Variance or Extension (40 CFR 268.7(a) (4)) This restricted waste identified above is subject to a case by case exemption under 40 CFR 268.5, an exemption under 40 CFR
		268.6 or a nationwide capacity variance under Subpart C of 40 CFR 268, and is not prohibited from land disposal. LDR prohibitions
		become effective on (date) for this restricted waste. The corresponding treatment standard(s) are promulgated in 40
Н.	П	CFR 268.40. I have attached all supporting analytical data, where available. Restricted Waste Managed In A "Lab Pack" (40 CFR 268.7(a) (9))
11.	لا	I certify under penalty of law that I personally have examined and am familiar with the waste and that the lab pack
		contains only waste that have been excluded under appendix IV to 40 CFR Part 268 and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am
		aware that there are significant penalties for submitting a false certification, including the possibility of a fine and
	_	imprisonment.
I certify	and v	warrant that the information that appears on this form, and appended documents, is true and correct. Ity indicated how my waste is to be managed in accordance with 40 CFR 268. My certification is
i nave c	orrec	rsonal examination of the information submitted, or is based on my inquiries of those individuals
	-	for obtaining the information.

Waste Stream Name: HAZARDOUS WASTE SOLIDS

Expiration Date

: 01/03/2009

Process

: Chem Ox

Dear Gary Brauchman,

Your Waste Stream Disposal Information form for the above waste stream has been approved.

Under conditions of our operating permit, US Ecology Texas, L.P. is required to inform you that we have all the appropriate permits in order to manage your waste stream. We have received the requisite permits to operate a TSD facility. Our TCEQ permit was renewed on December 2, 1999 and our permit number is HW-50052.

The EPA Uniform Hazardous Waste Manifest (EPA Form 8700-22), appropriate LDR form/certification and Truck Inventory Sheet (if shipping in drums) must accompany each shipment. To obtain manifest, Please visit the EPA website for an approved vendor list

Please notify the Texas facility at (800)242-3209 at least 48 hours prior to shipment and provide the facility with the following information:

- Date of Shipment
- Date of Delivery
- U.S. EPA Generator ID Number
- Waste Stream Number(s)
- Total quantity of each waste stream number being shipped

Any shipment arriving at the facility without prior scheduling and/or all the appropriate paperwork will be subject to rejection.

Should you have any questions, please contact your US Ecology Texas, L.P. Technical Sales Representative at (800) 242-3209. Please refer to the US Ecology Texas, L.P. waste stream number above when making inquiries.

Sincerely,

NICOLE SCHMALSTIEG

SECTION 1 - CHEMICAL PRODUCT and COMPANY IDENTIFICATION

1.1 Product Name Sulfidic Caustic Solution
Chemical Family Inorganic Salt Solution

Synonyms NA (mixture)
Formula NA (mixture)

1.2 Manufacturer CES Environmental Services, Inc.

4904 Griggs Road Houston, TX 77021 713-676-1460

1.3 Emergency Contact Matt Bowman 713-826-1329

CHEMTREC 800-424-9300

SECTION 2 - COMPOSITION and INFORMATION ON INGREDIENTS

2.1 Chemical Ingredients (% by wt)

Typical Analysis

 Sodium Sulfide (Na2S)
 CAS#: 1313-82-2
 2 – 15%

 Sodium Hydroxide (NaOH)
 CAS#: 1310-73-2
 0 – 15%

 Sodium Hydrosulfide (NaHS)
 CAS# 16721-80-5
 0 – 5%

 Sodium Carbonate (Na2CO3)
 CAS#: 497-19-8
 0 – 4%

 Water
 remaining %

(See Section 8 for exposure guidelines)

SECTION 3 - HAZARDS IDENTIFICATION

NFPA:

Health – 3

Flammability – 0

Reactivity - 1

EMERGENCY OVERVIEW

Warning: Solution is highly alkaline.

May evolve small amounts of hydrogen sulfide, a highly toxic gas. EYE contact will cause marked eye irritation and possible corneal damage. SKIN contact will result in irritation and possible corrosion of the skin. INGESTION will irritate and burn the mouth, throat and the gastrointestinal tract; contact with stomach acid will cause hydrogen sulfide vapors to be released. HEATING or ACID contact will cause hydrogen sulfide gas to evolve.

3.1 POTENTIAL HEALTH EFFECTS

EYE: Contact with the eyes will cause marked eye irritation and possibly severe corneal damage.

SKIN CONTACT: Contact with the skin will cause skin irritation or a burning sensation. Prolonged contact will result in corrosion of the skin.

SKIN ABSORPTION: Absorption is unlikely to occur.

INGESTION: Ingestion will result in severe burning and corrosion of mouth, throat and the gastrointestinal tract. If the ingested material contacts stomach acid, highly toxic hydrogen sulfide gas will be evolved.

INHALATION: Product solution and vapors contain some highly toxic hydrogen sulfide gas. Exposure to this gas causes headaches, nausea, dizziness and vomiting. Continued exposure can lead to loss of consciousness and death.

CHRONIC EFFECTS – CARCINOGENICITY: Not listed as a carcinogen by NTP, IARC or OSHA.

SECTION 4 - FIRST AID MEASURES

- 4.1 **EYES:** Immediately flush with large quantities of water for 15 minutes. Hold eyelids apart during irrigation to insure thorough flushing of the entire area of the eye. Obtain immediate medication.
- 4.2 **SKIN:** Immediately flush with large quantities of water. Remove contaminated clothing under a safety shower. Obtain immediate medical attention.
- 4.3 **INGESTION:** DO NOT INDUCE VOMITING. If victim is conscious, immediately give 2 to 4 glasses of water. if vomiting does occur, repeat fluid administration. Obtain immediate medical attention.
- 4.4 **INHALATION:** Remove victim form contaminated atmosphere. If breathing is labored, administer oxygen. If breathinghas ceased, clear airway and start mouth to mouth resuscitation. If heart has stopped beating, external heart massage should be applied. Obtain immediate medical attention.

SECTION 5 - FIRE FIGHTING MEASURES

5.1 FLAMMABLE PROPERTIES

FLASH POINT: Not Flammable

METHOD USED: NA

5.2 FLAMMABLE LIMITS: Hydrogen Sulfide

LFL: 4%

UFL: 44%

5.3 EXTINGUISHING MEDIA: Water spray or foam or as appropriate for combustion involved in fire.

- 5.4 FIRE and EXPLOSIVE HAZARDS: Solution is non-flammable. However if these solutions are exposed to heat or acids, hydrogen sulfide will be released and may form explosive mixtures with air (see above). Keep containers and/or storage vessels in fire area cooled with water spray. Heating may cause the release of hydrogen sulfide vapors.
- 5.5 FIRE FIGHTING EQUIPMENT: Because of the possible presence of toxic gases and the corrosive nature of the product, wear self-contained breathing apparatus, positive pressure, MSHA / NIOSH (approved or equivalent) and full protective gear.

SECTION 6 - ACCIDENTIAL RELEASE MEASURES

- 6.1 SMALL RELEASES: Isolate for 75 feet. Confine area to qualified response personnel. Wear proper Personnel Protective equipment (See Section 8). Confine release material by berming or diverting its path Absorb on sand, earth or other inert dry absorbent. Do not allow into sewer, storm drains or any waterway. Oxidize residual reactive sulfides with a weak (3-5%) hydrogen peroxide solution to stop the release of toxic hydrogen sulfide. Remove contaminated soil and dispose of in accordance with all governmental regulations.
- 6.2 LARGE RELEASES: Activate Emergency Response Plan procedures. Isolate release area for 500 feet. Confine area to qualified response personnel. Wear proper Personnel Protective Equipment (See Section 8). Shut off release, if safe to do so. Dike spill area to prevent runoff into sewers, drains (potential toxic and explosive mixtures of hydrogen sulfide in confined spaces) or surface waterways (potential aquatic toxicity). Recover as much of the solution as possible. Treat remaining material as a small release (See 6.1).

SECTION 7 - HANDLING and STORAGE

- 7.1 HANDLING: Wear proper protective equipment (See Section 8). Avoid breathing product vapors. Avoid contact with skin and eyes. Use only in a well ventilated area. Dilute product only in enclosed containers. Wash thoroughly after handling.
- 7.2 STORAGE: Store in well ventilated areas. Do not store combustibles in the area of storage vessels. Keep away from any sources of heat or flame. Store tote and smaller containers out of direct sunlight at moderate temperatures [<80 F (27 C)]. (See Section 10.4 for materials of construction)

SECTION 8 - EXPOSURE CONTROLS and PERSONAL PROTECTION

- 8.1 RESPIRATORY PROTECTION: If working near open container or storage vessel opening or open tank truck dome cover, wear self-contained breathing apparatus, positive pressure, MSHA / NIOSH (approved or equivalent).
- 8.2 SKIN PROTECTION: Neoprene rubber gloves, chemical suit and boots should be worn to prevent contact with the liquid. Wash contaminated clothing prior to reuse. Contaminated leather shoes cannot be cleaned and should be discarded.
- 8.3 EYE PROTECTION: Chemical goggles and a full face shield.

8.4 EXPOSURE GUIDELINES:

OSHA

ACGIH

LXI OGOINE GOIDELINES

TWA STEL

TLV STEL

Hydrogen Sulfide

20 ppm (ceiling)

10 ppm (ceiling)

8.5 ENGINEERING CONTROLS: Use adequate exhaust ventilation to prevent inhalation of product vapors. Where feasible scrub process or storage vessel vapors with caustic solution. Maintain eye wash safety shower in areas where chemical is handled.

SECTION 9 - PHYSICAL and CHEMICAL PROPERTIES

- 9.1 APPEARANCE: Light to dark brown to green or red liquid.
- 9.2 ODOR: Hydrocarbon (mercaptan), possibly hydrogen sulfide (rotten egg) odor.
- 9.3 BOILING POINT: Not Determined
- 9.4 VAPOR PRESSURE: Not Determined
- 9.5 VAPOR DENSITY: (Air = 1.0) 1.17
- 9.6 SOLUBILITY IN WATER: Complete
- 9.7 SPECIFIC GRAVITY: 1.03 1.3 (8.59 10.83 lbs/gal)
- 9.8 pH: 11.5 13.5
- 9.9 VOLATILE: Not Determined

SECTION 10 – STABILITY and REACTIVITY

- 10.1 STABILITY: This is a stable material.
- 10.2 HAZARDOUS POLYMERIZATION: Will not occur.
- 10.3 HAZARDOUS DECOMPOSITION PRODUCTS: Heating product will evolve H2S gas. fire conditions will cause the production of sulfur dioxide. Hydrogen sulfide (4 44%) may form flammable mixtures with air.
- 10.4 INCOMPATIBILITY: Acids will cause the release of highly toxic hydrogen sulfide. Sulfidic caustic solution is not compatible with copper, zinc, aluminum or their alloys (i.e. bronze, brass, galvanized metals, etc.). Corrosive to steel above 150 F (65.5 C). These materials of

Sulfidic Caustic Solution

SECTION 10 – STABILITY and REACTIVITY (Continued)

construction should not be used in handling systems or storage containers for this product. (See Section 7.2 Storage)

SECTION 11 - TOXICOLOGICAL INFORMATION

- 11.1 ORAL: Data not available.
- 11.2 DERMAL: Data not available.
- 11.3 INHALATION: INH-RAT LC 50: 444 ppm (hydrogen sulfide)
- 11.4 CHRONIC and CARCINOGENICITY: No evidence available.
- 11.5 TERATOLOGY: Data not available.
- 11.6 REPRODUCTION: Data not available.
- 11.7 MUTAGENICITY: Data not available.

SECTION 12 - ECOLOGICAL INFORMATION

None Available

SECTION 13 - DISPOSAL CONSIDERATIONS

If released to the environment for other than its intended purpose, this product contains some reactive sulfides but not a sufficient quantity to meet the definition of a D003, hazardous waste. The pH may be high enough to meet the definition of a corrosive waste, D002.

SECTION 14 - TRANSPORT INFORMATION

- 14.1 DOT SHIPPING NAME: Corrosive liquids, n.o.s.
- 14.2 DOT HAZARD CLASS: 8
- 14.3 UN/NA NUMBER: UN1760
- 14.4 PACKING GROUP: II
- 14.5 DOT PLACARD: Corrosive
- 14.6 DOT LABLE(s): Corrosive
- 14.7 IMO SHIPPING NAME: Sodium Hydroxide Solution
- 14.8 RQ (REPORTABLE QUANTITY): 1,000 lbs (454 Kg) 100% basis (Approx. 538 gals)
- 14.9 USCG BARGE CERTIFICATION: SSH (sodium sulfide, hydrosulfide solutions, H2S 15 ppm or less). SSI (sodium sulfide, hydrosulfide solutions, H2S greater than 15 ppm but less than 200 ppm).

Sulfidic Caustic Solution

SECTION 15 - REGULATORY INFORMATION

- 15.1 OSHA: This product is listed as a hazardous material under criteria of the Federal OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Dear Gary Brauchman.

Your Waste Stream Disposal Information form for the above waste stream has been approved.

Under conditions of our operating permit. US Ecology Texas, L.P. is required to inform you that we have all the appropriate permits in order to manage your waste stream. We have received the requisite permits to operate a TSD facility. Our TCEQ permit was renewed on December 2, 1999 and our permit number is HW-50052.

The EPA Uniform Hazardous Waste Manifest (EPA Form 8700-22), appropriate LDR form/certification and Truck Inventory Sheet (if shipping in drums) must accompany each shipment. To obtain manifest, Please visit the EPA website for an approved vendor list

Please notify the Texas facility at (800)242-3209 at least 48 hours prior to shipment and provide the facility with the following information:

- Date of Shipment
- Date of Delivery
- U.S. EPA Generator ID Number
- Waste Stream Number(s)
- Total quantity of each waste stream number being shipped

Any shipment arriving at the facility without prior scheduling and/or all the appropriate paperwork will be subject to rejection.

Should you have any questions, please contact your US Ecology Texas, L.P. Technical Sales Representative at (800) 242-3209. Please refer to the US Ecology Texas, L.P. waste stream number above when making inquiries.

Sincerely,

NICOLE SCHMALSTIEG

Dear Gary Brauchman,

Please review the attached copy of your Waste Product Questionnaire (WPQ) for above referenced waste stream.

Please indicate your wish to either renew or discontinue your renewal of this waste stream and sign below. If there have been any changes to the waste stream, its classification, characteristics, components, the process generating this waste, or any section of the WPQ, please inform us of these changes using the space below.

Please attach the following items and return this form to me to complete the renewal process: X Updated WPQ] Waste Sample for testing [] Current analytical (<1 year old) [] MSDS LDR Certification [] Current TCEQ Waste Code # Our technical review staff may be required to contact you for additional information if there are changes in federal or state regulations or company policy that would affect the management of this waste stream. To keep your waste stream approval current we request your response as soon as possible. If you have any questions, please call me at 1-800-242-3209 or 361-387-3518. Thank you for your cooperation. Sincerel **CUSTOMER SERVICE REP 1** |X| Please indicate your wish to renew W/S # 090059427-0 as described above. Indicate your wish not to continue the renewal of your W/S# 090059427-0 Please list any changes to waste stream 090059427-0 its classification, characteristics and components, the process generating this waste, or any section of the WPQ. Date

9020319+1 American Ecology Corporation Land Disposal Restriction Form CES ENVIRONMENTAL SERVICES, INC. TXD008950461 Generator: EPA I.D. Number: 090059427-Manifest # (with shipment): Waste Stream Number: Waste is a: Wastewater Debris **EPA WASTE CODE(S)** Sub Category For Debris - Contaminants subject to Treatment D018 Check if the waste is one of the following: \boxtimes D001 - D043 Complete Attachment 2 (UHC list) F001 - F005 Complete Attachment 3A (Spent Solvent) F039 Complete Attachment 3B (Leachate) If treatment standards are expressed as a specific technology then list the 5 letter treatment code(s): H132 Restricted Waste Meets Treatment Standards (40 CFR 268.7(a) (3)) The restricted waste identified above meets the treatment standards in 40 CFR 268.40 or Alturnitive LDR treatment standards for contaminated soil 40CFR268.49 and can be landfill disposed without further treatment. I have attached all supporting analytical data, where available. I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D. I believe that the information I submitted is true, accurate and complete, I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and B. Restricted Waste Treated To Treatment Standards (40 CFR 268.7(b) (I) & 268.7 (b) (2)) The treatment residue, or extract of such residue, or the restricted waste identified above has been tested to assure that the treatment residues or extract meet all applicable treatment standards in 40 CFR 268.40 and/or performance standards in 40 CFR 268.45. I have attached all supporting analytical data, where available. I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D. I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and C. Restricted Waste With Technology Based Treatment Standards (40 CFR 268.7(b) (4)) I certify under penalty of law that I personally have examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that based on my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the treatment standards specified in 40 CFR 268.40, without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment. D. Resticted Waste Decharacterized But Requires Treatment For UHC (40 CFR 268.9) I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains Underlying Hazardous Constituents (UHC) that require further treatment to meet the universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment. Complete LDR Attachment 2 for UHC. Restricted Waste Subject To Treatment (40 CFR 268.7(a) (2)) E. The restricted waste identified above must be treated to the applicable treatment standards in 40 CFR 268.40, or treated to comply with applicable prohibitions set forth in Part 268.32 or RCRA Section 3004(d). I have attached all supporting analytical data, where available. Hazardous Debris Subject To Treatment (40 CFR 268.45) F. This hazardous debris identified above must be treated to the alternative treatment standards in 40 CFR 268.45. G. Restricted Waste Subject To A Variance or Extension (40 CFR 268.7(a) (4)) This restricted waste identified above is subject to a case by case exemption under 40 CFR 268.5, an exemption under 40 CFR 268.6 or a nationwide capacity variance under Subpart C of 40 CFR 268, and is not prohibited from land disposal. LDR prohibitions (date) for this restricted waste. The corresponding treatment standard(s) are promulgated in 40 CFR 268.40. I have attached all supporting analytical data, where available. Restricted Waste Managed In A "Lab Pack" (40 CFR 268.7(a) (9)) H. I certify under penalty of law that I personally have examined and am familiar with the waste and that the lab pack contains only waste that have been excluded under appendix IV to 40 CFR Part 268 and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

I certify and warrant that the information that appears on this form, and appended documents, is true and correct. I have correctly indicated how my waste is to be managed in accordance with 40 CFR 268. My certification is based on personal examination of the information submitted, or is based on my inquiries of those individuals responsible for obtaining the information.

Mr. Sean Easton CES Environmental Services, Inc. 4904 Griggs Rd. Houston, TX 77021 RE: W/S #09-004-5039

Generator: CES Environmental Services Name: Corrosive Sludge Alkline

Dear Mr. Easton:

Due to our policy of reviewing each waste stream for disposal at our Robstown, TX facility on an annual basis, please review the attached copy of your Waste Disposal Information (WDI) form for the above referenced waste stream.

If there are no changes in the waste classification as hazardous/non-hazardous, the waste characteristics and components, the generating process, the waste stream name, or any other section of the WDI form please sign in the appropriate space below and return to me. If the waste classification is hazardous/ non –hazardous, and the waste characteristics or generating process has changed, please advise us of these changes in a separate letter.

Please supply the following items for the renewal process.

Updated WPQ (due to new software program, PLEASE COMPLETE EACH SECTION, SIGN, DATE & RETURN)

[] Preshipment sample for collaborated testing per 40 CFR 268.7(b)3 or 268.7(c)2
]] Current analytical (<1 year old)
[] MSDS
[] Annual Certification of LDR (a copy is attached)
E] Current TNRCC Waste Code#

Please be aware that while there may have been no changes to your waste stream file, our technical review staff may be required to contact you for additional information due to changes in federal and state regulations or company policy.

In order to keep your waste stream approval current, we request our response as soon as possible. If you have any questions, please do not hesitate to call me at 1-800-242-3209. Thank you for your cooperation.

Sincerely,

Glenda Felkner | Pw Glenda Felkner Customer Service Manager GF/rw/TXSGN.DOC

Please indicate your wish to renew W/S #09-004-5039 as described above.

[] Please indicated your wish not to continue the renewal of your waste W/S #09-004-5039 due to:

[] Waste no longer generated [] Other:

Date 2/9/05

Please return to: Ms/Glenda/Felkner, P.O. Box 307, Robstown, TX 78380, Fax #361-387-0794.

RE:

CES ENVIRONMENTAL HAZARDOUS WASTEWATER USOR 0503-01149

Dear Mr. Bowman:

Thank you for your interest in US Oil Recovery LLC. We are pleased to offer the following quote on your disposal requirements. Our quote includes the following:

Disposal or Recycling Manifesting

Profiling Assistance Labeling

The following conditions apply to all the pricing:

- Signed profile sheets must be on file.
- Waste received which does not conform to the profile may result in additional charges either for alternative disposal method required or round trip transportation to return waste to your facility. Material packaged in containers other than as indicated on the profile may be subject to surcharges as well.
- Prices are valid from 45 days from this date; please confirm older pricing.
- Prices are subject to all Local, State and Federal taxes and fees which may apply.
- Terms are net 30 days, interest at 1.5% per month will be charged to all accounts past due.

E. Generator Certification

By signing this profile sheet, the generator (or his representative) certifies that unless clearly stated about or in attachments:

- 1. This waste does not contain regulated quantities of PCB's (polychlorinated Bipheynyls).
- 2. This waste is not hazardous by reference to local and state law or reference to US EPA rules 40 CFR Part 261 Subpart C (characteristic hazardous wastes) and Part 261 Subpart D (listed hazardous wastes).
- This sheet and its attachments contain true and accurate descriptions of the waste material. All relevant information regarding known or suspected hazards in the possession of the generator have been disclosed.
- 4. The generator will promptly notify US Oil Recovery of any material change in the composition of the waste which could result in the waste otherwise being characterized as hazardous pursuant to US EPA rules.

Pricing

\$0.65 per lb, \$50.00 minimum per 55 Gallon Drum

Minimum charges and other analytical charges may apply.

Transportation

Rejection Charge: Waste that does not conform to the approved profile or PCI's other acceptance requirements shall be subject to an additional charge of \$300 per manifest, and such non-conforming waste

will be processed or returned to you at PCI's sole option.

Terms:

Net 30 days

In accordance with 40 CFR 264.12 "Required Notice" and State(s) equivalent regulations, Pollution Control Industries is informing the waste Generator that Pollution Control Industries' companies have the appropriate permit(s) for the above listed waste stream and will accept the waste stream as described by the Generator/Broker. This waste stream approval was founded on the information that the Generator/Broker provided pursuant to the Generator's compliance with 40 CFR 262.11 "Hazardous Waste Determination" and/or their States regulatory equivalent. If at any time the waste is found not representative of the information supplied by the Generator/Broker, title to such waste shall not pass to PCI, and in addition to the Rejection Charge described above, you shall be liable for all direct, indirect, and consequential damages incurred by PCI as a result of the non-conforming waste. PCI reserves the right, in its sole discretion, to utilize processes within RCRA environmental standards alternate to the billing code stated above to process the waste listed on this approval letter.

To facilitate the expedited receipt and processing of the above waste, PCI requires that the above listed Waste Stream # appear on each shipping document (Section I of manifest), and container (top and side).

As a final condition of PCI's acceptance, this approval letter must be signed and returned to PCI. This waste stream will not be valid for scheduling or acceptance at any PCI facility until a signed form is on file.

I agree with the terms as stated above and I certify that the information contained herein is accurate and in accordance with a system designed to assure that qualified personnel have properly gathered and evaluated the information submitted:

24-Hour Emergency Phone Number: 517-636-4400

Product: VORANATE* T-80 TYPE 1 TDI

Product Code: 92097

Effective Date: 02/17/98

Date Printed: 12/25/98

MSD: 000609

The Dow Chemical Company, Midland, MI 48674

Customer Information Center: 800-258-2436

2. COMPOSITION/INFORMATION ON INGREDIENTS

Toluene diisocyanate (TDI) (mixed isomer)

CAS# 026471-62-5 1007

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

POTENTIAL HEALTH EFFECTS (See Section 11 for toxicological data.)

EYE: May cause severe eye irritation. May cause moderate corneal injury. Vapors may irritate eyes.

Skin: Prolonged or repeated exposure may cause severe irritation, even a burn. Skin contact may result in skin or respiratory sensitization but is not expected to result in absorption of amounts sufficient to cause other adverse effects.

INGESTION: Single dose oral toxicity is considered to be extremely low. Ingestion may cause gastrointestinal irritation or ulceration. Small amounts swallowed incidental to normal handling operations are not likely to cause injury, swallowing amounts larger than that may cause injury.

NATERIAL SAFETY DATA SHEET

Product: VORANATE* T-80 TYPE I TDI

Product Code: 92097

Effective Date: 02/17/98

Date Printed: 12/25/98

MSD: 000609

INHALATION: Excessive vapor concentrations are readily attainable and may cause serious adverse effects, even death. Single or repeated excessive exposure to TDI may cause severe irritation of the upper respiratory tract and lungs, respiratory or skin sensitization, decreased ventilatory capacity, cholinesterase depression & gastrointestinal distress. Excessive exposure may cause neurologic signs and symptoms. Airborne isocyanate concentrations below the exposure guidelines may cause allergic respiratory reactions in individuals already sensitized, Effects may be delayed.

SYSTEMIC (OTHER TARGET ORGAN) EFFECTS: Based on available data, repeated exposures are not anticipated to cause any additional significant adverse effects.

CANCER INFORMATION: for hazard communication purposes under USHA standard 29 CFR Part 1910.1200, this chemical is listed as a potential carcinogen by NTP and LARC. An oral study in which high doses of TDI were reported to cause cancer in animals has been found to contain numerous deficiencies which compromise the validity of the study. TDI did not cause cancer in laboratory animals exposed by inhalation, the most likely route of exposure.

TERATOLOGY (Birth Defects): Birth defects are unlikely. Exposures having no effect on the mother should have no effect on the fetus. Did not cause birth defects in animals; other effects were seen in the fetus only at doses which caused toxic effects to the mother.

REPRODUCTIVE EFFECTS: In animal studies, has been shown not to interfere with reproduction.

4. FIRST AID

EYE: Irrigate with flowing water immediately and continuously for 15 minutes. Consult medical personnel.

5KIN: Remove material from skin immediately by washing with soap and plenty of water (warm water is preferable if readily available). Remove contaminated clothing and shoes while washing. Seek medical attention if irritation persists.

INGESTION: Do not induce vomiting. Give large amounts of water or milk if available and transport to medical facility.

NATERIAL SAFETY DATA SHEET

PAGE: 3

Product: VORANATE* T-80 TYPE I TDI

Product Code: 92097

Effective Date: 02/17/98

Date Printed: 12/25/98

MSD: 000609

INHALATION: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, oxygen should be administered by qualified personnel. Call a physician or transport to a medical facility.

NOTE TO PHYSICIAN: May cause tissue destruction leading to stricture. If lavage is performed, suggest endotracheal and/or esophagoscopic control. If burn is present, treat as any thermal burn, after decontamination. May cause respiratory sensitization. Respiratory symptoms, including pulmonary edema, may be delayed. Persons receiving significant exposure should be observed for 48 hours for signs of respiratory distress. Chloinesterase inhibition has been noted in human exposure but is not of benefit in determining exposure and is not correlated with signs of exposure. No specific antidote. Supportive care. Treatment based on judgment of the physician in response to reactions of the patient.

5. FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES
FLASH POINT: 260F, 127C
METHOD USED: PMCC, ASTM 093
AUTOIGNITION TEMPERATURE: > 1100F, (595C)

FLAMMABILITY LIMITS

LFL: 0.9% v/v (244F. 118C) (2,4 isomer)

UFL: 9.5% v/v (270F, 150C)

HAZAROOUS COMBUSTION PRODUCTS: During a fire, smoke may contain the original material in addition to unidentified toxic and/or irritating compounds. Hazardous combustion products may include but are not limited to: Nitrogen oxides. Isocyanates, Carbon monoxide, Carbon dioxide and Hydrogen cyanide.

OTHER FLAMMABILITY INFORMATION: Product reacts with water. Reaction may produce heat and/or gases. Violent steam generation or cruption may occur upon application of direct water stream to hot liquids. Dense smoke is produced when product burns. Spills of organic liquids on hot fibrous insulation may result in spontaneous combustion and lead to fire.

EXTINGUISHING MEDIA: Carbon dioxide, dry chemical, foam, water fog or fine spray. For large fires, alcohol resistant foams (ATC type) are preferred if available. General purpose

MATERIAL SAFETY DATA SHEET

PAGE: 4

Product: VORANATE* T-80 TYPE I TDI

Product Code: 92097

Effective Date: 02/17/98

Date Printed: 12/25/98

MSD: 000609

synthetic foams (including AFFF) or protein foams may function, but much less effectively. Water is not recommended, but may be applied in very large quantities as a fine spray when other extinguishing agents are not available.

FIRE FIGHTING INSTRUCTIONS: Keep people away. Isolate fire area and deny unnecessary entry. Stay upwind. Keep out of low areas where gases (fumes) can accumulate. Contain fire water run-off if possible.

PROTECTIVE EQUIPMENT FOR FIRE FIGHTERS: Wear positive-pressure self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire fighting helmet, coat, pants, boots, and gloves). Avoid contact with this material during fire fighting operations. If contact is likely, change to full chemical resistant clothing with SCBA. This will not provide sufficient fire protection, consider fighting fire from a remote location.

6. ACCIDENTAL RELEASE MEASURES (See Section 15 for Regulatory Information)

PROTECT PEOPLE: Avoid any contact. Clear non-emergency personnel from area. Keep upwind of spill. Barricade area. The area must be evacuated and reentered by persons equipped for decontamination. Use appropriate safety equipment. Ventilate area of leak or spill. If available, use foam to suppress vapors. See Section 5 for more specific information. For additional information, refer to "Exposure Controls/Personnel Protection", MSDS Section 8.

PROTECT THE ENVIRONMENT: Contain liquid to prevent contamination of soil, surface water or ground water.

CLEAN-UP: Absorb with material such as: sawdust, vermiculite, dirt, sand, clay, cob grit, millisorb. Avoid materials such as cement powder. Collect material in suitable and properly labeled open containers. Do not, place in sealed container. Prolonged contact with water results in a chemical reaction which may result in rupture of the container. Place in: polylined fiber pacs, plastic drums, or properly labeled metal containers. Remove to a well ventilated area. Clean up floor areas. Attempt to neutralize by adding materials such as: 52 ammonia or 52 sodium (bi) carbonate solution; with 22 detergent. If ammonia is used, use good ventilation to prevent vapor exposure. If you have any questions on how to neutralize call

Date Printed: 12/25/98

MSD: 000609

The Dow Chemical Company.

Please refer to Disposal Information, MSDS Section 13. See Section 7 and 15 for more specific information.

7. HANDLING AND STORAGE

HANDLING: Use only with adequate ventilation. Do not eat, drink, or smoke in working area.

Refer to Exposure Controls/Personal Protection, Section 8, of the MSDS.

STORAGE: Store indoors. Store between 65-104F (18-40C). Protect from atmospheric moisture. Maintain a nitrogen atmosphere. Do not store product contaminated with water to prevent potential hazardous reaction. See Reactivity & Stability, Section 10, of the MSDS. For more Storage and Mandling information refer to bulletin 109-01243.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

ENG!NEERING CONTROLS: Provide general and/or local exhaust ventilation to control airborne levels below the exposure guidelines. Use only with adequate ventilation.

PERSONAL PROTECTIVE EQUIPMENT

EYE/FACE PROTECTION: Use chemical goggles. If vapor exposure causes eye discomfort, use a full-face respirator.

SKIN PROTECTION: Use protective clothing impervious to this material. Selection of specific items such as faceshield, gloves, boots, apron, or full-body suit will depend on operation. Remove contaminated clothing immediately, wash skin with soap and water (warm water if available) and launder clothing before reuse. Contaminated leather items, such as shoes, belts and watchbands, should be removed and destroyed.

RESPIRATORY PROTECTION: Atmospheric levels should be maintained below the exposure guideline. When respiratory protection is required for certain operations, use an approved positive-pressure supplied-air respirator. For emergency and other conditions where the exposure guideline may be greatly exceeded, use an approved positive-pressure self-contained breathing apparatus or positive-pressure airline with

MSD: 000609

auxiliary self-contained air supply.

EXPOSURE GUIDELINES (S): Toluene dissocyanate (TDI) Dow 1HG is 0.02 ppm Ceiling. ACGIH TLV and OSHA PEL are 0.005 ppm TWA, 0.02 ppm STEL.

PELs are in accord with those recommended by OSHA, as in the 1989 revision of PELs.

9. PHYSICAL AND CHEMICAL PROPERTIES

APPEARANCE: Clear colorless to pale yellow liquid.

ODOR: Sharp pungent.

VAPOR PRESSURE: 0.01 mmHg @ 20C

VAPOR DENSITY: 6.0 (air=1)

BOILING POINT: Z50C (482F)

SQLUBILITY IN WATER: Insoluble in water, reacts with evolution

of CO2.

SPECIFIC GRAVITY: 1.22 @ 25/15.50 .

10. STABILITY AND REACTIVITY

CHEMICAL STABILITY: Stable under recommended storage conditions. See storage section.

CONDITIONS TO AVOID: Avoid temperatures above 104F (40C). Avoid temperatures below 65F (18C) . Avoid moisture. Product can decompose at elevated temperatures.

INCOMPATIBILITY WITH OTHER MATERIALS: Avoid contact with metals such as: aluminum, brass, copper, galvanized metals, zinc. Reaction with water will generate carbon dioxide. Generation of a gas can cause pressure buildup in closed systems. Reaction with water will generate heat. Avoid contact with acids, alcohols, amines, ammonia, bases, metal compounds, moist air, strong oxidizers, water. Avoid unintended contact with polyols.

HAZARDOUS DECOMPOSITION PRODUCTS: Hazardous decomposition products depend upon temperature, air supply and the presence of other materials.

HAZARDOUS POLYMERIZATION: Can occur. Polymerization can be catalyzed by: strong bases and water. Elevated temperatures can cause hazardous polymerization.

11. TOXICOLOGICAL INFORMATION (See Section 3 for Potential Health Effects. For detailed toxicological data, write or call the address or non-emergency number shown in Section 1)

(Continued on page 7)

MATERIAL SAFETY DATA SHEET

Product: VORANATE* T-80 TYPE I TDI

Product Code: 92097

Effective Date: 02/17/98

Date Printed: 12/25/98

MSD: 000609

SKIN: The LD50 for skin absorption in rabbits is > 9400 mg/kg.

INGESTION: The oral LD50 for rats is 5,800 mg/kg.

INHALATION: The LC50 for rats is approximately 100 mg/m3 (aerosol) for 4 hours.

NUTAGENICITY: Animal mutagenicity studies were negative. In-vitro mutagenicity studies were inconclusive. In vitro mutagenicity studies were negative in some cases and positive in other cases.

12. ECOLOGICAL INFORMATION (For detailed Ecological data, write or call the address or non-emergency number shown in Section 1)

ENVIRONMENTAL FATE

MOVEMENT & PARTITIONING: In the aquatic or terrestrial environment, movement is expected to be limited by its reactivity with water, forming predominantly insoluble polymers.

DEGRADATION 6 PERSISTENCE: In the environment, material reacts with water forming insoluble polymers (polyurea crusts) which appear to be stable.

ECOTOXICITY: Acute aquatic toxicity ranges from moderata to practically non-toxic in most species tested; however, it is highly toxic to a specific life stage of the Japanese red sea bream.

13. DISPOSAL CONSIDERATIONS (See Section 15 for Regulatory Information)

DISPOSAL: DO NOT DUMP INTO ANY SEWERS, ON THE GROUND. OR INTO ANY BODY OF WATER. All disposal methods must be in compliance with all Federal, State/Provincial and local laws and regulations. Regulations may vary in different locations. Waste characterizations and compliance with applicable laws are the responsibility solely of the waste generator. THE DOW CHEMICAL COMPANY HAS NO CONTROL OVER THE MANAGEMENT PRACTICES OR MANUFACTURING PROCESSES OF PARTIES HANDLING OR USING THIS MATERIAL. THE INFORMATION PRESENTED HERE PERTAINS ONLY TO THE PRODUCT AS SHIPPED IN ITS INTENDED CONDITION AS DESCRIBED IN MSDS SECTION 2 (Composition/Information On Ingredients).

I. WASTE MATERIAL PROFILE SHEET

In accordance with the Federal and State regulations, it is necessary for the Generator of hazardous waste to properly identify the waste for their records as well as to supply the disposal facility with the information necessary to handle the waste. The information outlined below

must be complete, and signed by the generator. PLEASE PRINT LEGIBLY OR TYPE.

Generator Name:

Address:

CERTIFICATE OF DISPOSAL

This is to certify that the waste materials received from CES Environmental Services, Inc., Houston, TX

Manifest # 004245235JJK

Document # N/A

Received 6/19/2008

has been managed and disposed of in accordance with all applicable Federal, State, and local laws and regulations.

Date: 06/30/2008

Bv:

Monte J. Dilick, Vice President of Sales & Marketing

CES Environmental Services, Inc., Houston, TX Manifest # 004245235JJK Document #: N/A Received 6/19/2008

This is to certify that 4 container(s) were received on Line 1. and the RCRA empty container(s) have been sold as 200 pounds of scrap metal for recycling. The remaining containers not recycled were thermally treated

All Scrap metal is sent to one of the following scrap metal brokers: Sol Alman Comany 1300 East 9th Street Little Rock, AR 72202

Date: 06/30/2008

A. Tenebaum Company, Inc. P.O. Box 15128 GMF North Little Rock, AR 72202

Monta I Diliok Vice President of Soles & Marketin

- Rineco ensures that each container is "empty" by the relevant Resource Conservation and Recovery Act and Hazardous Waste Management Code Regulatory standards prior to processing.
- Rineco manages residue (ash) from the Container Decontamination Unit into waste derived fuel for ultimate destruction through energy recovery at cement kilns.
- 3. Weights are based on industry estimates of an average of 50 lbs. per 55 gallon steel drum.
- 4. The scrap metal is typically shredded, bundled, or otherwise processed by the scrap metal brokers

CERTIFICATE OF DISPOSAL

This is to certify that the waste materials received from CES Environmental Services, Inc., Houston, TX

Manifest # 004018430JJK

Document # N/A

Received 6/12/2008

has been managed and disposed of in accordance with all applicable Federal, State, and local laws and regulations.

Date: 06/20/2008

Bv

Monte J. Dilick, Vice President of Sales & Marketing

Certificate of Recycling

CES Environmental Services, Inc., Houston, TX
Manifest # 004018430JJK
Document #: N/A
Received 6/12/2008

This is to certify that 6 container(s) were received on Line 1. and the RCRA empty container(s) have been sold as 300 pounds of scrap metal for recycling. The remaining containers not recycled were thermally treated

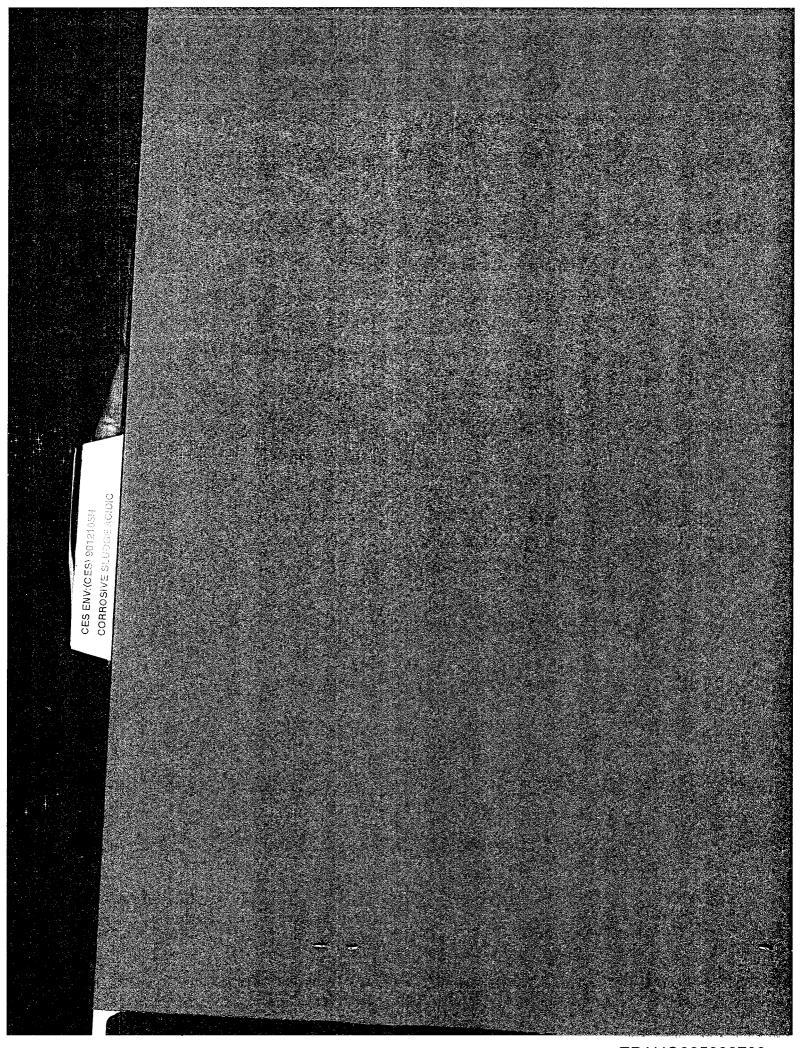

All Scrap metal is sent to one of the following scrap metal brokers: So! Alman Comany 1300 East 9th Street Little Rock, AR 72202

Date: 06/20/2008

A. Tenebaum Company, Inc. P.O. Box 15128 GMF North Little Rock, AR 72202

Monte J. Dilick, Vice President of Sales & Marketing

- Rineco ensures that each container is "empty" by the relevant Resource Conservation
 and Recovery Act and Hazardous Waste Management Code Regulatory standards prior to
 processing.
- Rineco manages residue (ash) from the Container Decontamination Unit into waste derived fuel for ultimate destruction through energy recovery at cement kilns.
- 3. Weights are based on industry estimates of an average of 50 lbs. per 55 gallon steel drum.
- 4. The scrap metal is typically shredded, bundled, or otherwise processed by the scrap metal brokers in a manufacturing facilities as a result metarial in their processes.

Faclity NOR No.:	30900	Waste Code:	9012105 H							
Waste Stream Name:	CORROSIVE S.	LUDGE, ACIDK

Mr. Sean Easton CES Environmental Services 4904 Griggs Rd. Houston, TX 77021

RE: W/S #09-004-5040 Generator: CES Environmental Name: Waste Corrosive Sludge

Dear Mr. Easton:

Due to our policy of reviewing each waste stream for disposal at our Robstown, TX facility on an annual basis, please review the attached copy of your Waste Disposal Information (WDI) form for the above referenced waste stream.

If there are no changes in the waste classification as hazardous/non-hazardous, the waste characteristics and components, the generating process, the waste stream name, or any other section of the WDI form please sign in the appropriate space below and return to me. If the waste classification is hazardous/ non -hazardous, and the waste characteristics or generating process has changed, please advise us of these changes in a separate letter.

Please supply the following items for the renewal process.

Updated WPQ (due to new software program, PLEASE COMPLETE EACH SECTION, SIGN, DATE & RETURN)

waste streams CANTOI be renewed not waste accepted diness an information is updated and	, ictuin
] Preshipment sample for collaborated testing per 40 CFR 268.7(b)3 or 268.7(c)2	
] Current analytical (<1 year old)	
] MSDS	
] Annual Certification of LDR (a copy is attached)	
] Current TNRCC Waste Code#	

Please be aware that while there may have been no changes to your waste stream file, our technical review staff may be required to contact you for additional information due to changes in federal and state regulations or company policy.

In order to keep your waste stream approval current, we request our response as soon as possible. If you have any

questions, please do not hesitate to call me at 1-800-242-3209. Thank you for your cooperation. Sincerely, Felkner/Rw Glenda Felkner Customer Service Manager GF/rw/TXSGN.DOC Please indicate your wish to renew W/S #09-004-5040 as described above. [] Please indicated your wish not to continue the renewal of your waste W/S #09-004-5040 due to: [] Other: [] Waste no longer generated Authorized Signature_ Please return to: McGlenda Felkner, P.O. Box 307, Robstown, TX 78380, Fax #361-387-0794.

Part 1. General Information					
Description of Process which generates the waste:		nom wastewater	treatment with		
Description of the Waste Stream:	RD Concer	ntrate			
Par	Part 2. Hazardous Waste Determination				
If the answer to any of the questions in the Part is "yes", then the waste is hazardous. If it is hazardous, it cannot be classified as a non-hazardous waste. If the answers are "no" to all of the questions and the waste is an industrial waste, then proceed to Part 3. If the answers are "no" to all of the questions and the waste is a non-industrial waste, stop here					
Is the wase a listed hazard with a listed hazardous waste, listed hazardous waste?	·		NO		
2. Is the waste ignitable per 4	0 CFR 261.21?		YES		
3. Is the waste corrosive per	40 CFR 261.22?		NO		
4. Is the waste reactive per 40	CFR 261.23?		NO		
5. Is the waste toxic per 40 C	FR 261.24?		YES		
Part 3.	Class 1 & class	2 Waste Determina	tion		
If the answer to any of the que Class 1 waste. If all the answe waste can be considered a Cla	ers to the following que				
 Has the generator chosen to Class 1 waste? (If yes, okay to questions.) 					
Are any of those constituents listed in Table 1 of 30 TAC 335.521(a)(1) resent at concentrations equal to or greater than levels identified in that able?					
	Is the waste a container (if yes, see TNRCC rules)?				
I. Does the waste contain Reglefined in 40 CFR Part 61?	gulated Asbestos Con	taining Material as			
. Is the waste contaminated by a material that originally contained greater han or equal to 50 parts per million total polychlorinated biphenyls (PCBs)?					
Does the waste contain gre		•			
 If your waste is specifically in ontaminated with a material in oes the waste contain greater 	dentified as a petroled dentified as a petroleu than 1,500 ppm TPH	um substance, or as m substance waste, l?			
. Is the waste from the produ	ction of a "new chemi	cal substance"?			
. Is the waste generated outs	ide the state of Texas	?			

Faclity NOR No.:	30900	Waste Code:	90272074
Waste Stream Name:	RO Con	centrate,	
10. If the waste is a liquid, do degrees C)150 degrees F)?	es it have a flash po	int of less than 65.6	YES
11. Is the waste a solid or ser incident to storage, transportathrough friction, retained heat can be ignited readily, and whas to create a serious hazard	ation, and disposal, i from manufacturing en ignited burns so	s liable to cause fires g or processing, or which	N/A
12. Is the waste a solid or semi-solid which, when mixed with an equivalent weight of ASTm Type II laboratory distilled or de-ionized water, produces a solution having a pH less than or equal to 2 greater than or equal to 12.5?			Nla
13. Is information lacking which Class 3 waste?	ch demonstrates tha	at the waste is a Class 2 or	NÛ

If the answer to any of the preceding questions in this Part is "yes", then the non-hazardous, industrial waste is a Class 1 waste. If all the answers are "no", then the industrial waste can be considered a Class 2 waste.

If the answers are "no" to *all* of the preceding questins of this Part, the industrial generator may wish to evaluate the waste for a possible Class 3 classification.

WASTE IDENTIFICATION/ACCEPTANCE: The Waste Profile Document provided by CUSTOMER is incorporated by reference into this Agreement. TM Deer Park Services Limited Partnership (TM). TM Deer Park Services Limited Partnership reserves the right to reject any waste that does not conform to the Waste Materials identified above and on the Waste Profile Document. Nonconforming waste, if in TM Deer Park Services Limited Partnership possession, will be removed by TM Deer Park Services Limited Partnership at CUSTOMER's expense within 48 hours from notification of nonconformance. Additionally, CUSTOMER is responsible for all costs resulting fromall costs associated with CUSTOMER's notification of non-conformceing waste (including waste not correctly characterized) after receipt and acceptance by TM Deer Park Services Limited Partnership. All costs include, but are not limited to: equipment or facility damage, remediation or corrective action, administrative and/or legal costs, as well as any fines and/or penalties. TM Deer Park Services Limited Partnership may manage the Waste Materials at any of its facilities or the facilities of its affiliates, or may subcontract with others (including affiliates) for the management of the Waste Materials. Such arrangements will not relieve TM Deer Park Services Limited Partnership of its obligations under this Agreement.

SCHEDULING/SHIPPING: Scheduling must be arranged through TM Deer Park Services Limited Partnership by calling Scheduling at (281) 930-2540 between 8:00 AM - 5:00 PM Mon.-Fri, at least 48 hours in advance unless TM Deer Park Services Limited Partnership agrees otherwise. Shipments must travel with a Texas Uniform Hazardous Waste Manifest and a Land Disposal Restriction Notification (LDRN). CUSTOMER acknowledges that it has received and understands TM's Deer Park Services Limited Partnership procedures for entry and exit to and from its properties and agrees to comply with such procedures, which are incorporated into this Agreement. Further, CUSTOMER understands and agrees that TM Deer Park Services Limited Partnership has the absolute right, in its sole discretion, in addition to its other remedies, to terminate this Agreement should TM Deer Park Services Limited Partnership determine, in its sole discretion, that CUSTOMER or any of its employees, invitees, contractors, or other agents are not in total compliance with all of such procedures.

PRICE/PAYMENT TERMS: Prices and payment terms are subject to change on 30 days written notice from TM Deer Park Services Limited. refreship to CUSTOMER. Invoices are due and payable on receipt. All accounts not paid within 30 days of invoice date will bear interest at the mire allowed by law. Additional credit restrictions may apply. TM Deer Park Services Limited Partnership reserves the right to apply additional charges.

WARRANTIES: CUSTOMER and Texas TM Deer Park Services Limited Partnership each warrant: it will comply with all laws, regulations, orders and ordinances applicable to the collection of the Waste Materials at and transportation of the Waste Materials from CUSTOMER's premises, and to the treatment and disposal of the Waste Materials after leaving CUSTOMER's premises; and it will comply with all rules, policies and procedures established by the other for admission to the other's facilities. CUSTOMER warrants: the description of the Waste Materials as represented by the Waste Profile Document is correct and complete, includes all information regarding the Waste Materials that present or may present a risk or hazard to persons, property, the environment or ecosystem, and fairly advises TM Deer Park Services Limited Partnership of the hazards or risks known to CUSTOMER to be incident to the handling or disposal of the Waste Materials. If CUSTOMER is responsible for transportation, (i) all demurrage charges, including loading and unloading, are for the account of CUSTOMER and (ii) CUSTOMER will deliver the Waste Materials to TM Deer Park charges including loading and unloading, are for the account of CUSTOMER and (i) CUSTOMER will deliver the Waste Materials to TM Deer Park Services Limited Partnership in such a manner so as to minimize spillage or contamination or risk of injury to or exposure of persons, property, the environment or the ecosystem; at all times after the Price Effective Date it will continue to promptly disclose to TM. Deer Park Services Limited Partnership all information relating to components of the Waste Materials that present or may present a hazard or risk to persons, property, the environment or the ecosystem; and CUSTOMER is under no legal, administrative, judicial or regulatory restraint which prohibits the removal; transportation or disposal of the Waste Materials or the transfer of possession of the Waste Materials to TM Deer Park Services Limited Partnership. TM Deer Park Services Limited Partnership warrants: it is experienced in, and engaged in the business of, providing waste management services for hazardous and nonhazardous materials; and it has the appropriate permits to manage the Waste Materials.

MISCELLANEOUS: Each party will indemnify the other for breaches of representations, agreements or warranties made in this Agreement. All representations and warranties survive the termination of this Agreement. In the event of a dispute, the prevailing party shall be awarded attorney's fees and costs. This Agreement is effective as of the earlier of the date below CUSTOMER's signature or the date Waste Materials are first shipped to TM Deer Park Services Limited Partnership and will continue until either party sends 30 days written notice of termination to the other. This Agreement represents the entire agreement of the parties with respect to the Waste Materials identified herein. This Agreement is governed by Texas law, without reference to its choice of law provisions.

This Agreement must be accepted by CUSTOMER within 30 days from Price Effective Date above. CUSTOMER's acceptance (either by signature or by shipment of Waste Materials to PM Deer Park Services Limited Partnership constitutes full acceptance of the terms and conditions herein and all other terms and conditions, whether found in requests for proposals, purchase orders, acknowledgments or otherwise, are null and void.

TM Deer Park Services Limited Partnership WS#	

All characteristic wastes (EPA Codes D001 through D043) must be treated for Underlying Hazardous Constituents. If your waste has any of these codes and contains any of the following constituents you are required by law to represent this fact to TM Deer Park Services by checking the applicable constituents listed below. You must then complete the TM Deer Park Services Land Disposal Restriction Notification form to specify how your waste must be managed (Sec. 268.7)

Does this waste contain one or more of the constituents listed on pages 1, 2 or 3? YES 🗆 NO 🗀 If "Yes", check applicable constituents and then sign and date the form. If "No", then sign and date the form.

- [1] CAS: Chemical Abstract Services. When the waste code and/or regulated constituents are described as a combination of a chemical with its salts and/or esters, the CAS number is given for the parent compound only.
- [2] Concentration standards for wastewater's are expressed in mg/l and are based on analysis of composite samples
- [3] Except for Metals (EP or TCLP) and Cyanides (Total and Amenable) the nonwastewater treatment standards expressed as a concentration were established, in part, based upon incineration in units operated in accordance with the technical requirements of 40 CFR part 264, supbart O, or 40 CFR part 265, subpart O, or based upon combustion in fuel substitution units operataing in accordance with applicable technical requirements. A facility may comply with these treatment standards according to provisions in 40 CFR 268.40(d). All concentration standards for non-wastewaters are based on analysis of grab samples.
- [4] Both Cyanides (Total) and Cyanides (Amenable) for nonwastewaters are to be analyzed using Method 9010 or 9012, found in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods", EPA Publication SW-846, as incorporated by reference in 40 CFR 260.11, with a sample size of 10 grams and a distillation time of one hour and 15 minutes.
- [5] These constituents are not "underlying hazardous constituents" in characteristic wastes, according to the definition at 268.2(i).
- [6] Between August 26, 1997 and August 26, 1998, these constituents are not underlying hazardous constituents as defined at 268.2(i).

[59FR 47982, Sept. 19, 1994; 60 FR 242, Jan. 3, 1995; 61 FR 15566, Apr. 08, 1996; 61 FR]

I certify that the above is true and correct and that the submission of a false or misleading certification can lead to the possibility of fines or imprisonment.

WASTE IDENTIFICATION/ACCEPTANCE: The Waste Profile Document provided by CUSTOMER is incorporated by reference Into this Agreement, TM Deer Park Services Limited Partnership (TM). TM Deer Park Services Limited Partnership reserves the right to reject any waste that does not conform to the Waste Meterials identified above and on the Waste Profile Document. Nonconforming waste, if in TM Deer Park Services Limited Partnership possession, will be removed by TM Deer Park Services Limited Partnership at CUSTOMER's expense within 48 hours from notification of nonconformance. Additionally, CUSTOMER is responsible for all costs resulting fromall costs associated with CUSTOMER's notification of non-conformacing waste (including waste not correctly characterized) after receipt and acceptance by TM Deer Park Services Limited Partnership. All costs include, but are not limited to: equipment or facility damage, remediation or corrective action, administrative and/or legal costs, as well as any fines and/or penalties. TM Deer Park Services Limited Partnership may manage the Waste Materials at any of its facilities or the facilities of its affiliates, or may subcontract with others (Including affiliates) for the management of the Waste Materials. Such arrangements will not relieve TM Deer Park Services Limited Partnership of its obligations under this Agreement.

SCHEDULING/SHIPPING: Scheduling must be arranged through TM Deer Park Services Limited Partnership by calling Scheduling at (281) 930-2540 between 8:00 AM - 5:00 PM Mon.-Fri. at least 48 hours in advance unless TM Deer Park Services Limited Partnership agrees otherwise. Shipments must travel with a Texas Uniform Hazardous Waste Manifest and a Land Disposal Restriction Notification (LDRN). CUSTOMER acknowledges that it has received and understands TM's Deer Park Services Limited Partnership procedures for entry and exit to and from its properties and agrees to comply with such procedures, which are incorporated into this Agreement. Further, CUSTOMER understands and agrees that TM Deer Park Services Limited Partnership has the absolute right, in its sole discretion, in addition to its other remedies, to terminate this Agreement should TM Deer Park Services Limited Partnership determine, in its sole discretion, that CUSTOMER or any of its employees, invitees, contractors, or other agents are not in total compliance with all of such procedures.

PRICE/PAYMENT TERMS: Prices and payment terms are subject to change on 30 days written notice from TM Deer Park Services Limited Partnership to CUSTOMER. Invoices are due and payable on receipt. All accounts not paid within 30 days of invoice date will bear interest at the maximum rate allowed by law. Additional credit restrictions may apply. TM Deer Park Services Limited Partnership reserves the right to apply additional charges.

WARRANTIES: CUSTOMER and Texas TM Deer Park Services Limited Partnership each warrant: it will comply with all laws, regulations, orders and ordinances applicable to the collection of the Waste Materials at and transportation of the Waste Materials from CUSTOMER's premises, and to the treatment and disposal of the Waste Materials after leaving CUSTOMER's premises; and it will comply with all rules, policies and procedures established by the other for admission to the other's facilities. CUSTOMER warrants: the description of the Waste Materials as represented by the Waste Profile Document is correct and complete, includes all information regarding the Waste Materials that present or may present a risk or hazard to Waste Profile Document is correct and complete, includes all information regarding the Waste Materials that present or may present a risk or hazard to persons, property, the environment or ecosystem, and fairly advises TM Deer Park Services Limited Partnership of the hazards or risks known to CUSTOMER to be inclident to the handling or disposal of the Waste Materials. If CUSTOMER is responsible for transportation, (I) all demurrage charges, including loading and unloading, are for the account of CUSTOMER and (ii) CUSTOMER will deliver the Waste Materials to TM Deer Park Services Limited Partnership in such a manner so as to minimize spillage or contamination or risk of injury to or exposure of persons, property, the environment or the ecosystem; at all times after the Price Effective Date it will continue to promptly disclose to TM Deer Park Services Limited Partnership all information relating to components of the Waste Materials that present or may present a hazard or risk to persons, property, the environment or the ecosystem; and CUSTOMER is under no legal, administrative, judicial or regulatory restraint which prohibits the removal, transportation or disposal of the Waste Materials or the transfer of possession of the Waste Materials to TM Deer Park Services Limited Partnership. TM Deer Park Services Limited Partnership warragis: it is experienced in, and engaged in the business of providing waste management services for TM Deer Park Services Limited Partnership warrants: it is experienced in, and engaged in the business of, providing waste management services for hazardous and nonhazardous materials; and it has the appropriate permits to manage the Waste Materials.

MISCELLANEOUS: Each party will indemnify the other for breaches of representations, agreements or warranties made in this Agreement. All representations and warranties survive the termination of this Agreement. In the event of a dispute, the prevailing party shall be awarded altorney's fees and costs. This Agreement is effective as of the earlier of the date below CUSTOMER's signature or the date Waste Materials are first shipped to TM Deer Park Services Limited Partnership and will continue until either party sends 30 days written notice of termination to the other. This Agreement represents the entire agreement of the parties with respect to the Waste Materials identified herein. This Agreement is governed by Texas law, without reference to its choice of law provisions.

This Agreement must be accepted by CUSTOMER within 30 days from Price Effective Date above. CUSTOMER's acceptance (either by signature or by shipment of Waste Materials to TM Deer Park Services Limited Partnership constitutes full acceptance of the terms and conditions herein and all other terms and conditions, whether found in requests for proposals, purchase orders, acknowledgments or otherwise, are null and void.

If your waste is specifically identified as a petroleum substance, or as contaminated with a material identified as a petroleum substance waste, does the waste contain greater than 1,500 ppm TPH? 8. Is the waste from the production of a "new chemical substance"?	3. Is the waste corrosive per	40 CFR 261.22?					
Part 3. Class 1 & class 2 Waste Determination If the answer to any of the questions in the Part is "yes", then the non-hazardous, industrial waste is a Class 1 waste. If all the answers to the following questions in this Part ar "no", then the industrial waste can be considered a Class 2 waste. 1. Has the generator chosen to classify his non-hazardous waste as a Class 1 waste? (If yes, okay to stop here and answer N?A for the following questions.) 2. Are any of those constituents listed in Table 1 of 30 TAC 335.521(a)(1) present at concentrations equal to or greater than levels identified in that table? 3. Is the waste a container (if yes, see TNRCC rules)? 4. Does the waste contain Regulated Asbestos Containing Material as defined in 40 CFR Part 61? 5. Is the waste contaminated by a material that originally contained greater than or equal to 50 parts per million total polychlorinated biphenyls (PCBs)? 6. Does the waste contain greater than or equal to 50 ppm PCBs? 7. If your waste is specifically identified as a petroleum substance, or as contaminated with a material identified as a petroleum substance waste, does the waste contain greater than 1,500 ppm TPH? 8. Is the waste from the production of a "new chemical substance"?	4. Is the waste reactive per 4	0 CFR 261.23?		NU			
If the answer to any of the questions in the Part is "yes", then the non-hazardous, industrial waste is a Class 1 waste. If all the answers to the following questions in this Part ar "no", then the industrial waste can be considered a Class 2 waste. 1. Has the generator chosen to classify his non-hazardous waste as a Class 1 waste? (If yes, okay to stop here and answer N?A for the following questions.) 2. Are any of those constituents listed in Table 1 of 30 TAC 335.521(a)(1) present at concentrations equal to or greater than levels identified in that table? 3. Is the waste a container (if yes, see TNRCC rules)? 4. Does the waste contain Regulated Asbestos Containing Material as defined in 40 CFR Part 61? 5. Is the waste contaminated by a material that originally contained greater than or equal to 50 parts per million total polychlorinated biphenyls (PCBs)? 6. Does the waste contain greater than or equal to 50 ppm PCBs? 7. If your waste is specifically identified as a petroleum substance, or as contaminated with a material identified as a petroleum substance waste, does the waste contain greater than 1,500 ppm TPH? 8. Is the waste from the production of a "new chemical substance"?	5. Is the waste toxic per 40 C	FR 261.24?	<u> </u>	YES			
Class 1 waste. If all the answers to the following questions in this Part ar "no", then the industrial waste can be considered a Class 2 waste. 1. Has the generator chosen to classify his non-hazardous waste as a Class 1 waste? (If yes, okay to stop here and answer N?A for the following questions.) 2. Are any of those constituents listed in Table 1 of 30 TAC 335.521(a)(1) present at concentrations equal to or greater than levels identified in that table? 3. Houston , TX 77021	11c)		
(713) 676-1460	11c)		

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is negligible contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipperin, must be attached to the treight bill submitted to Shipper or the "Billed to" party and sent to:
